Model 38-7X-CCOAP

Model 107X Retrofit Door- Cisco APs

Category: Retrofit Doors for Oberon Enclosures

This locking retrofit door is designed to provide a convenient way to mount and secure Cisco wireless access points in 1075, 1076, 1077, and 1078 Series AP enclosures. Simply unlock door and remove three nuts from hinge to replace door. Simplify equipment replacement without lifting ceiling tiles.
