

S110® PATCH PLUG

Siemon S110 patch plugs are both category 5e compliant and can be field-terminated to either solid or stranded cable. 4-pair S110 patch plugs employ a patented design to improve electrical isolation between pairs, enhancing cross-talk performance so that the mated plug and connecting block significantly exceed category 5e transmission requirements.

S110 PRODUCTS

Ergonomic handle aids insertion and removal of patch plug from 110 connect block

Directional arrow provided assists in proper insertion orientation

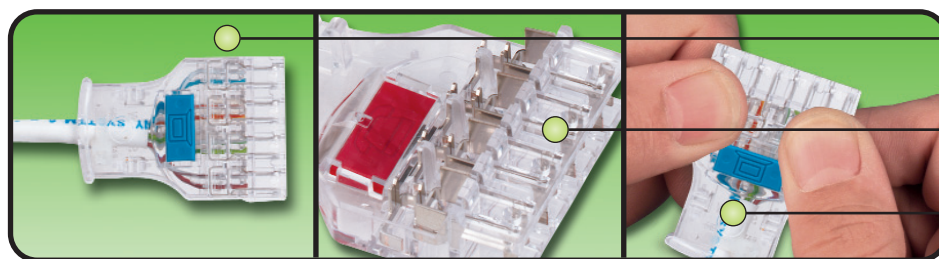

Clear plastic housing allows the conductor colors and positions to be visible for matching termination positions on the opposite end

Optional colored icon tabs assist in color-coding 2-, 3- and 4-pair plugs

Each plug housing includes built-in polarization features to ensure proper tip-ring orientation during connection

Technical Tip!

When S110-to-modular plug cable assemblies are configured in the field, The Siemon Company recommends that Siemon MC® 5 modular patch cords be purchased and cut in half. The end of the cord can then be field terminated to the S110P patch plug while the factory terminated and tested modular plug end remains undisturbed

Terminates 24 to 26 AWG (0.40mm to 0.51mm) solid or 7-strand twisted-pair cable

Staggered contacts in bi-directional planes provide excellent pair-to-pair isolation, delivering component and channel performance to 160 MHz

Simply snap the base and cover together to mass terminate all conductors
