

Hemispheric IP Video Door Station

Better Overview. Increased Security.

With the IP Video Door Station, MOBOTIX is introducing a new product line in the area of door communication and access control that supports the VoIP/SIP video telephone standard. The T24 records all events outside the house door with sound; automatically when the doorbell is rang, with movement in the image or upon triggering a contact.

Complete video solution with powerful performance ...

- Complete Panorama view from wall to wall and from floor to ceiling thanks to Hemispheric technology
- Recording with sound of all activities in front of the door, automatically around the clock
- Two-way video worldwide via IP telephony or computer with remote door-opening function
- Integrated messaging features for leaving and retrieving messages directly at the door
- Keyless entry using PIN code or transponder with intelligent time control
- Simple installation, optional use of two existing bell wires instead of network cable

... see separate brochure for building technology

Complete Panorama View For Superior Overview

The high-resolution Hemispheric door camera with 3.1 megapixel image sensor and internal MicroSD storage allows monitoring of the entire entrance area. Complete Panorama view from wall to wall and floor to ceiling.
