

- Top-opening system
- Indoor/Outdoor installations
- Universal internal adapter for several speed domes and network PTZ cameras
- Camera power supply equipped with internal adapter
- Version with cooling device
- Protection rating IP66 (not for double filter cooled version)
- Fan-assisted heater

The MEDUSA dome housing offers a unique top-opening system, designed to give easy access to all cabling, connections and the dome camera for an incredibly comfortable installation and service.

All the available camera adapters are very simply mechanically adjustable, allowing the positioning and the fastening of almost every speed dome and PTZ network camera existing in the market.

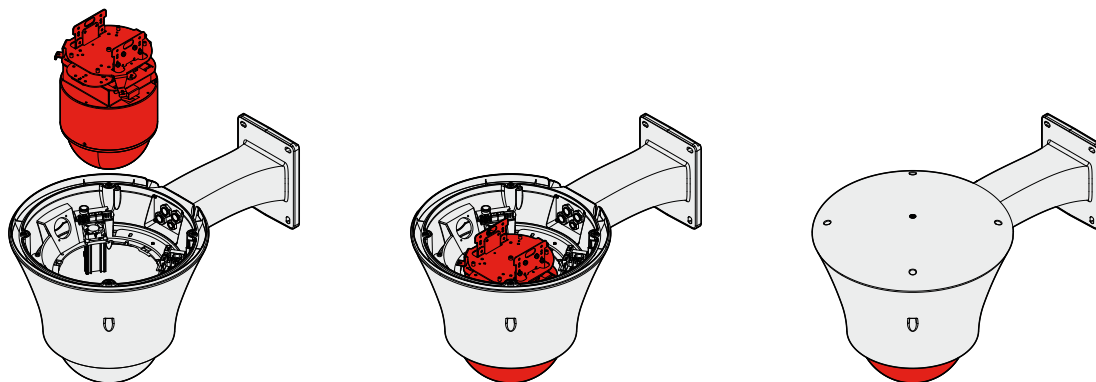

Moreover all internal adapters are equipped with a camera power supply and are always sold separately, as it can be chosen according to the main power available on site.

Constructed from die-cast aluminium with a PMMA bubble, the MEDUSA offers extreme sturdiness, weatherproof protection and attractive design and it is suitable for indoor and outdoor installations. Different mounting options are available, all with internal cable management: wall bracket, corner and pole adapters. The ceiling/parapet bracket is equipped as an option with a rotating plate which allows the rotation of the arm and simplifies the assembling operations and the maintenance of the housing and camera.

The standard version is supplied with sunshield and fan-assisted heater. When it is important to keep the housing's internal temperature down, an optional efficient cooling system is available, consisting of 2 filters placed in the body of the housing and two blowers placed in the internal adapter in order to allow internal/external air circulation to occur.

A reinforced heater, for low temperature environments, is available as an easy installable accessory.

For a total anti vandal protection, the lower hemisphere is available in polycarbonate material, fully transparent or smoked.

### TECHNICAL DATA

#### GENERAL

Built in die-cast aluminium  
 Epoxypolyester powder painting, RAL9002 colour  
 Lower hemisphere: in PMMA transparent or smoked (in this case the loss of luminosity is 1 lux)  
 Sunshield in ABS for outdoor, RAL9002 colour

#### MECHANICAL

External dimensions with sunshield: Ø 351x335mm (13.8x13.2in)  
 External dimensions without sunshield: Ø 314x322mm (12.4x12.7in)  
 4 cable-glands: 3xM16 allowing Ø cable 3,5-7mm (0.1-0.3in), 1xM12 allowing Ø cable 5-10mm (0.2-0.4in)  
 Supplied with instruction manual, cable glands and protection gasket

#### ELECTRICAL
