The Conteg Intelligent & Basic Power product range comprises three different technologies to address the needs of the higher density computing user. The range comprises power strips which feature either no intelligence (Basic), the ability to remotely monitor current draw per strip using Ethernet and IP (Monitored range) or the ability to fully manage power strips and groups of power strips across the network (Managed range). Conteg Intelligent & Basic Power offers a combination of outlets, including national outlet styles combined with industrial outlets, high amperage inputs and both 1-phase and 3-phase powered models. Standard 1-phase input plug styles are the EN309 16A and 32A type or the IEC-C20 or Schuko/UTE which are also rated for 16A operation, standard 3-phase input plug is the EN309 3x16A.

Intelligent & basic power distribution units

BASIC POWER

These Basic Power Distribution Units are designed for standard applications without above standard safety or operational requirements. These models provide reliable power to the cabinet for standard environment.

DESCRIPTION:

- Types:
 - a) 19" mounting
 - b) 10" mounting
 - c) free standing
 - d) vertical
- Outlets type UTE, SCHUKO, UK, IEC320 C13, IEC320 C19
- Other outlet types in combination with surge protection and ammeter also available
- Power output:
 - SCHUKO, UTE, IEC320 C19: 16A, 250V
 - UK: 13A, 250V
 - IEC320 C13: 10A, 250V

* panels contain HF filtre

¹ for vertical installation use DP-RP-VM-01

² for vertical installation use DP-RP-VM-02, see above picture "Basic PDU with DP-RP-VM-02"

INTELLIGENT POWER MONITORED

Strips feature a local easy-to-read ammeter on the outlet strip along with the ability to monitor the current draw of outlets remotely over an Ethernet connection. The user can aggregate the information from thousands of Intelligent Power Strips in one location. Designed for high density, mission-critical server applications, the Conteg MONITORED power strips provide reliable power to the cabinet for both standard and Blade server environments.

Other types including 3-phase models 3x16A and 3x32A upon request

¹ INPUT power cords for these models must be ordered separately (see table on next page)

INTELLIGENT POWER MANAGED

Strips represent the leading edge in functionality available in a power strip. Employing a server-grade microprocessor, this product has unprecedented management and monitoring capabilities available through the built in web-server and firewall.

- Switch individual outlets on or off to enable remote reboot of servers
- Virtual grouping of outlets for single-click reboot of multi-corded servers

- Single-click control of entire racks or non-critical loads
- Current Monitoring per outlet (POM)
- User definable sequencing of outlets for reboot

Designed for high-density, mission-critical server applications, the Conteg Managed Power strips provide reliable power to the cabinet for both standard and blade server environments.

managed PDU

INTELLIGENT POWER DISTRIBUTION UNITS - MANAGED (MONITORED PER OUTLET)
