

PanZone® Wireless Access Point Enclosure Retrofit Kit

A Wireless Access Point (WAP) retrofit kit is now available to upgrade Panduit® PanZone® Enclosures previously installed with Cisco® 1200, 1230 or 1240 WAPs to the latest Cisco® 1142 and 3500 WAPs. This kit includes a new steel powder coated bracket, aluminum replacement door, hinge pins and attachment hardware. The user is able to remove the old WAP bracket and door from the enclosure and replace them with parts that are compatible with the new Cisco® 1142 or 3500 series WAP, eliminating the cost of purchasing a new enclosure. This allows a quick conversion without the time and cost associated with having to remove the unit from the ceiling or wall and without removing adjacent ceiling tiles.

Technical Information

Part Number:	PZWRKA
Internal bracket:	5.8"H x 5.8"W x 1.7"D (147mm x 147mm x 44mm)
Door:	13.6"H x 11.9"W x .3"D (346mm x 303mm x 8mm)

Key Features and Benefits

Upgrade to the latest WAP	Increases the performance of the wireless system by allowing installation of the latest 802.11/n WAP
Easy upgrade of existing WAP enclosures	Maintains and extends the value in previously purchased enclosures and ceiling tile brackets; compatible with wall or ceiling mounted Panduit® PanZone® Enclosures PZWIFIEA or PZWIFIED
Upgrade existing enclosure without accessing ceiling	Opening the ceiling can allow dust and debris in the work area; in some health care environments this kit will preclude the need for isolation barriers
Time saving	WAP can be upgraded with less time and effort than required for a complete enclosure replacement
