key features and benefits

DPoE™ Compact 8 Midspan Accessories

DPoE™ 1 RU Shelf	Allows up to three DPoE™ Compact 8 Midspans to be mounted horizontally across into a single rack space, allowing customers to grow their system and components, as needed, while conserving valuable rack space
DPoE™ Wall Mount Bracket	Provides a flexible method of mounting the DPoE™ Compact 8 Midspan to various surfaces, including wall and pole mount, offering ease and flexibility of installations
DPoE™ 8-Port Passive Module	Compact 8-position passive patch panel frame that provides convenient, flexible, and scalable integration into the DPoE™ 1 RU Shelf through the use of modular Mini-Com® Jacks (ordered separately)

applications

The Panduit® DPoE™ Compact 8 Midspan provides a dependable, cost effective solution for expanding PoE in networks that require data port convergence in a power midspan solution. Panduit® DPoE™ Compact 8 Midspan Accessories support and secure the power midspan for use. The Gigabit Ethernet and 2X power enhanced capable design of the DPoE™ Compact 8 Midspan allows for optimum data transmission efficiency while simultaneously providing robust power for

the latest PoE Powered Device demand and beyond. The shielded port design provides immunity to electromagnetic and radio frequency interferences. By utilizing the DPoE™ Compact 8 Midspan and Accessories, customers can obtain a scalable PoE solution that is enabled for future PoE and data transmission demands, while minimizing their initial implementation expenditures. Long-term benefits include greater network reliability and reduced operating expenses.
