

AXIS Indoor Vandal Resistant Housings

For Fixed Axis Network Cameras

AXIS Indoor Vandal Resistant Housings provide maximum protection for fixed Axis Network Cameras. The three separate models provide mounting options for walls, corners and ceilings. All are constructed with a 14-gauge steel and off-white powder coat finish.

The housings ship with a clear Lexan viewing window for increased protection against vandalism. An easy-to-replace Window Guard™ paint shield allows vandalized windows to be quickly and economically restored to clarity. All mounting hardware is fully contained inside the housing to prevent tampering.

- Three models:
 - AXIS Indoor Fixed Wall Housing
 - AXIS Indoor Fixed Corner Housing
 - AXIS Indoor Fixed Ceiling Housing
- Indoor installation
- Tailor-made for most fixed Axis Network Cameras*
