# RACK-TO-RUNWAY MOUNTING PLATE USING J-BOLTS

Secures cable runway to the top of Standard and Universal equipment racks. J-Bolts hook under the mounting plate to secure the plate to the rack's top angles. Mounts either parallel or perpendicular. For proper attachment of 6" runway, use top bars (13045 Series) rather than top angles on your rack.
- Various sizes accommodate our popular cable runway widths and rack depths
- Includes haradware to match 1.25" high or 1.5" high rack top angles (current and past models of CPI Standard and Universal Racks)
- Kits (10595) and (12121) consist of:
  - 1 mounting plate
  - 4 J-Bolts, 5/16-18 x 2-1/4"
  - 2 J-Bolts, 5/16-18 x 2"
  - 4 hex nuts, 5/16-18
  - 4 split lock washers, 5/16"
- Kits (12408) and (12409) consist of:
  - 1 mounting plate
  - 2 J-Bolts, 5/16-18 x 3-1/4"
  - 2 J-Bolts, 5/16-18 x 2-1/4"
  - 4 hex nuts, 5/16-18
 - 4 split lock washers, 5/16"
