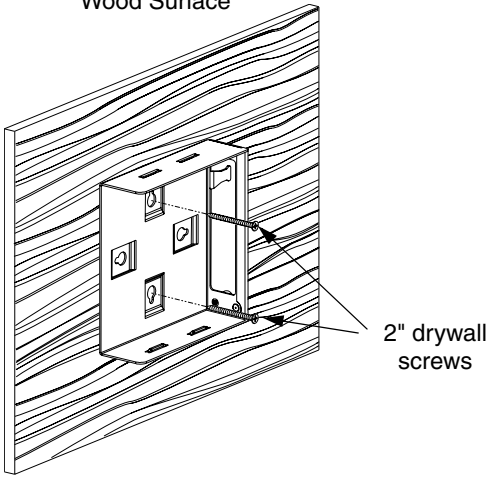
DPoE Wall Mount Bracket

Part Number: DPOEWM8B

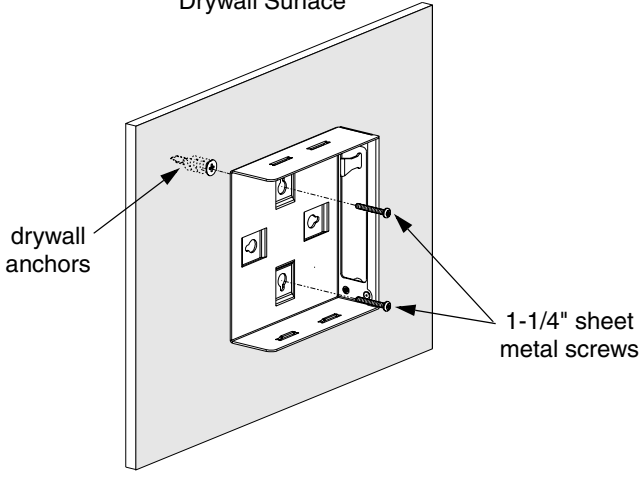
© Panduit Corp. 2006

INSTALLATION INSTRUCTIONS PN423B

Wood Surface

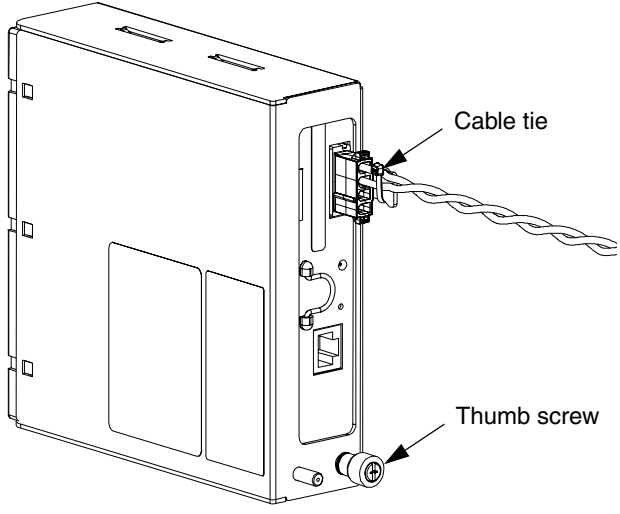


Drywall Surface



The *PANDUIT DPoE* Wall Mount Bracket can be installed in any orientation on either a wood surface using the included 2” (5 cm) drywall screws or a drywall surface using the included drywall anchors and sheet metal screws. Drive screw or insert drywall anchor and sheet metal screw approximately 1" below the highest point on the surface where the unit is to be located. (NOTE: If the back side of the bracket is the highest location, take into account the additional space needed for the power harness tie down, the thumb screw, and the ground stud.) Slip bracket over screw head. Drive second screw or mark location of second anchor for mounting hole opposite first screw. Make sure bracket is properly in place and tighten down both screws.

For Technical Support: ***www.panduit.com/resources/install_maintain.asp***



Slide-in and secure the *DPoE* Compact 8 Midspan (*PANDUIT* part no. DPOE8S2XG) or the *DPoE* Modular 8 Port Passive Module (*PANDUIT* part no. DPOEPL8BU) to the Wall Mount Bracket with the thumb screw. Be sure to fasten the power harness to the Wall Mount Bracket with the included cable tie (*PANDUIT* part no. PLT1.5I).

Refer to the *DPoE* Compact 8 Midspan Installation Instructions (*PANDUIT* part no. PN420*) or the *DPoE* Modular 8 Port Passive Module Installation Instructions (*PANDUIT* part no. PN422*) for more detailed installation information.

* Denotes revision letter
