

## Overview

The GE Micro Multi-purpose Panic Button features an updated design that is both chlorine- and UV-resistant for long-lasting and reliable performance. In addition, the Panic Button is water-resistant and functions as a wireless device used for activating police, fire, or auxiliary alarms throughout the premises. When the panic button is pressed, the LED mounted under the front cover will blink and an alarm signal is transmitted.

The status of the battery is sent in every transmission, and the battery is field-replaceable.

The button also has five adapters that easily fit onto the panic button. Using these adapters, the panic button can be mounted on the wall, worn as a belt clip, watch, or pendant for maximum flexibility.

## Features

- Activates police, fire, or auxiliary alarms
- Works with all 319.5 MHz Learn Mode panels
- Water-resistant rating to IPX7 (1 meter for 30 minutes)
- Includes adapters for wall mounting or wearing as a belt clip, watch, or pendant
