Anixter Item #: 12G-1816POS

ShawFlex Item #: ST022M181610000

300V TP0(IS-OS)TT-16, IEEE MARINE SHIPBOARD CABLE
16PR 18AWG 7W TINNED COPPER, FR PVC Insulation , Individual and Overall Aluminium/Mylar Tape Shielding
FR PVC Jacket
Suitable for use in 75C Wet/Dry
ABS & Transport Canada approved

```
Specification Reference
                                                  IEEE 45
                Electrical Characteristics
                    Voltage Class (volts):
                                                  300
Max. DC Conductor Res. (ohms/Mft @25C):
                                                  7.509
                                                                                          24.64
                                                                                                   ohms/km)
        Capacitance(cond to cond)(pF / ft):
                                                  43.4
                                                                                           142 5
                                                                                                   pF / mt)
       Capacitance (cond to shield)(pF / ft):
                                                  81.2
                                                                                           266
                                                                                                   pF/mt)
                Ampacity @ 30C (amps)*:
       Inductive Reactance (Ohms/1000ft):
                                                  0.040
                                                                                           0.13
                                                                                                   ohms/Km)
         Characteristic Impedance (Ohms):
                                                  526
             Construction Specifications
                                                  18AWG 7W TINNED COPPER (Concentric)
             Type of Conductor Stranding:
                                                  ASTM B8 & ASTM B33
             ASTM Standard (Conductor):
               Diameter of Conductor (in):
                                                  0.046
                                                                                                   mm)
               Conductor Insulation Type:
                                                  FR PVC
                 Insulation Thickness (in):
                                                  0.025
                                                                                           0.64
                                                                                                   mm )
      Nominal Insulated Wire Diameter (in):
                                                  0.098
                                                                                           2.49
                                                                                                   mm)
                       Pair Identification:
                                                  Black & White Number Coded
                      Pair Twists per foot:
                                                  5.08
                                                                                          16.68
                                                                                                   m)
             Ind. Component Shield Type:
                                                  7/8" X 1.35 MIL FOIL FREE AL/MYLAR Tape
    Ind. Component Shield Drain Wire Size:
                                                  20 AWG 7W TINNED COPPER
                  Overall Separator Type:
                                                  Clear Mylar Tape (1mil thick)
           Type of Overall Shielding Tape:
                                                  1.5" X 1.35 MIL STR-EDGE AL/MYLAR Tape
         Overall Shielding Drain Wire Size:
                                                  20 AWG 7W TINNED COPPER
                                                  90C -40C FR PVC, BLACK
                    Jacket Type & Colour:
      Average Outer Jacket Thickness (in):
                                                  0.080
                                                                                           2.03
                                                                                                   mm)
         Nominal Overall OD of Cable (in):
                                                  1.031
                                                                                           26.2
                                                                                                   mm)
                     Jacket Identification:
                                                  SHAWFLEX ST 16PR 18AWG TP0(IS-OS)TT-16
                                                  300V (-35C) MARINE SHIPBOARD CABLE
                                                  ANSI/IEEE Std 1580-2001 ETL LISTED 111525 MADE IN CANADA
                                                  ST022M181610000 (mo#) (month year)
                                                  (sequential metre marking every 1 metre)
                Physical Characteristics
                                                                                                   kg/km)
                   Cable Weight (lbs/Mft):
                                                  538
                                                                                           800
   Max. Pulling Tension (Pulling Eye) (lbs):
                                                  416
                                                                                            189
                                                                                                   kg)
    Max. Pulling Tension (Cable Grip) (lbs):
                                                  239
                                                                                            108
                                                                                                   kg)
      Min. Bending Radius: Permanent (in):
                                                  12.4
                                                                                           314
                                                                                                   mm)
            Min. Bending Radius: Pull (in):
                                                  18.6
                                                                                           471
                                                                                                   mm)
         Max. Conductor Temperature (C):
                                                  75C
     Recommended Min. Install Temp. (C):
                                                  -10C
                 Copper Content(lbs/Mft):
                                                  221.6
                                                                                          329.7
                                                                                                   kg/km)
                                                  CSA FT-4, IEC 60332-3 Category 'A'
           Flame Propagation Test Rating:
                       Additional Ratings:
                                                  -35C Cold Impact, -40C Cold Bend
```

^{*} Ampacity value based on IEEE Standard 45, Table-9-1. Values are corrected according to Table-9-1 for number of Conductors.
