

Pretium EDGE® Solutions Housing, Fixed

4 rack units, holds 32 Pretium EDGE® Solutions Modules or Panels

CORNING

Pretium EDGE® Solutions housings are available in various sizes and mount in 19-in racks or cabinets. Combined with Pretium EDGE Solutions trunks, modules and jumpers, they provide industry leading high-density connectivity.

In the main distribution area, the Pretium EDGE® Solutions housing provides a cross-connect for first level backbone cables, entrance cables and equipment cables. In the equipment distribution area, the housing is an interconnect to system equipment (such as SAN switches, servers and IP switches). The housing also accommodates the mixing and matching of multiple Pretium EDGE Solutions modules and panels within one chassis.

Industry-leading port labeling is available on the rear side of the housing's front door, and each housing includes mounting plug receptacle areas at the rear, which enable fast and easy installation and strain-relief of Pretium EDGE® Solutions trunk cables. Brush cable entry makes trunk entry quick and easy.
