

# Rack Power Distribution

Worldwide

**APC**<sup>™</sup>

by Schneider Electric

## Introduction

APC™ by Schneider Electric™ offers a wide array of standardized Rack Power Distribution Units (PDUs) designed to increase manageability and efficiency in your data center.

### Basic Rack PDUs

- reliable power distribution

### Metered Rack PDUs

- real-time remote monitoring of connected loads
- user-defined alarms warn IT and data center managers of potential circuit overloads to prevent accidental power loss to critical equipment

### Switched Rack PDUs

- metered functionality
- individual outlet control to power cycle outlets
- manage on-off equipment sequencing

### Metered by Outlet Rack PDUs

- provide greater power management
- individual outlet-level power metering
- user-resettable energy (kWh) logs for capacity planning and energy efficiency initiatives

### AP8000 Series Rack PDUs

The AP8000 Series Rack PDU platform will help IT and facilities managers more effectively manage power capacity and functionality for critical network, server, and data center equipment. These Rack PDUs solve rack-level power needs while incorporating intelligent features such as real power measurement and environmental monitoring, all in a space-efficient, zero-U form factor. AP8000 Series Rack PDUs include active power metering and remote alarming with volts, amps, real power (kW), and energy (kWh) measurements.

## Basic Rack PDUs

APC Basic Rack PDUs provide reliable power distribution via a single input with multiple output receptacles and distributes power from low-amperage, single-phase circuits to higher-power, three-phase solutions.

## Choosing APC Rack PDUs

Use the Rack PDU Selector to help you choose from our diverse rack power distribution offerings, designed to meet the needs of entry-level networking equipment and high-density server and blade environments.

[www.apc.com/tools/selector/pdu/](http://www.apc.com/tools/selector/pdu/)

The APC Rack PDU Selector can filter Rack PDU selection by:

- > Family type
- > Output voltage
- > Mount style (vertical or horizontal)
- > Input plug
- > Localized price

A wide selection of APC Rack PDUs are also available in Schneider Electric Design Portal tools such as:

- > InfraStruxure™ Designer
- > Small IT Solution Designer

# Metered Rack PDUs

Metered Rack PDUs provide real-time remote monitoring of connected loads. User-defined alarms warn of potential circuit overloads before critical IT failures occur.

### Rack PDU Software options:

APC Intelligent Rack PDUs provide remote power utilization data and optional outlet control to allow data center managers to make informed decisions on load balancing and right-sizing IT environments to lower total cost of ownership.

Remote access to Intelligent Rack PDUs is available via:

- > Web browser
- > Telnet (CLI)
- > SNMP

### Integration with StruxureWare for Data Centers Software

APC Rack PDUs, when combined with StruxureWare™ Data Center Operations, help provide an instant overview of data center operations with additional inventory management, PUE calculation, real-time device alarms, and location-based drill-down of power distribution.

# Switched Rack PDUs

Switched Rack PDUs provide advanced load monitoring combined with remote on/off switching control of individual outlets for power cycling, delayed power sequencing, and outlet use management.

## What is metered on AP8800, AP8900, and AP8600 Series Rack PDUs?

- > **Device:** power and energy
- > **Phase:** current\*, power, and voltage
- > **Internal circuit breaker (bank):** current\*
- > **Outlet:** current, power, energy (AP8600 Series only)

## Why do we meter?

- > **Device:** Rack level capacity change, planning, and efficiency calculations
- > **Phase:** Balance loads between phases to protect against tripping upstream branch circuit breakers
- > **Internal circuit breaker (bank):** Protect against tripping internal circuit breakers
- > **Outlet:** Detailed capacity change, equipment efficiency, and trends

\*AP7000 series monitors current per phase and breaker only.

## Metered by Outlet with Switching Rack PDUs

Metered-by-outlet Rack PDUs provide real-time remote monitoring of each individual outlet to empower IT professionals with the necessary tools for advanced data center energy management.

## Extended Warranties\*

APC by Schneider Electric offers extended warranties that provide a continuation of coverage beyond the original factory warranty period. This service extends the security and protection provided by your factory warranty and ensures that your product will be repaired or replaced if necessary, at no additional charge. Extended warranties are available for purchase in one year increments.

This service is available for all Rack PDUs, Rack ATs, Rack LCD consoles, and KVM switches, and includes:

- > Technical support from product-specific support engineers to assist with questions or concerns
- > Cross shipment of parts or replacement product – no waiting for your critical equipment

Add an extended warranty to your shopping cart on [www.apc.com](http://www.apc.com) for new purchases or purchase an extended warranty for your existing product.

\*Check with your local sales representative for extended warranty services available
