

## Enterprise Health Manager

### *Stand-Alone, Client-Server Monitoring System for exacqVision Factory Servers*

#### Key Features & Benefits:

- **Stand-Alone Monitoring System** — Centrally monitors and logs the status of all exacqVision servers health including: video loss of any analog camera, connection loss of any IP camera, hard drive failure, system temperature, board status and server connection
- **Automated Alerts** — Immediately alerts the user via email or text when a change is detected. Users can also configure alerts to be sent when specific events occur.
- **Records Events** — A real-time event log records and allows the user to view all unacknowledged, current and active events. Unacknowledged and active events remain in that state until fully cleared.
- **Supports exacqVision Servers** — Monitors all factory exacqVision Enterprise-enabled servers with a valid Software Subscription Agreement (SSA) within the deployment.
