## AIRBORNEM2M™ INDUSTRIAL PRODUCTS CAN BE DEPLOYED INTO A WIDE RANGE OF APPLICATIONS ACROSS VARIOUS INDUSTRIES INCLUDING:

- Vehicle Telematics & Diagnostics
- Material Handling & Logistics
- Industrial Automation Test & Measurement
- Security & Access Control
- Military communications

The AirborneM2M™ line of industrial wireless device serial servers and Ethernet Bridge/Routers are built for networking equipment in an array of machine-to-machine (M2M) applications. AirborneM2M™ Industrial Series feature industrial strength packaging and support a wide temperature rating (-40° to 85°C) to withstand challenging M2M environments. Available in both single and dual serial port models or a single Ethernet port model. Power options include 5-36VDC input or PoE 802.3af (Power over Ethernet) on select models.

### Dual-Band Wi-Fi

The AirborneM2M™ products establish wireless connections over both 2.4 GHz and 5 GHz bands. Whenever the 2.4 GHz airspace is overcrowded with competing wireless transmission, AirborneM2M™ products can be switched over to 5 GHz band to keep data flowing.

### Enterprise Class Security

Security protocols are important to mission-critical wireless M2M applications. AirborneM2M™ multi-layered security approach addresses the requirements of Enterprise-class networks and corporate IT departments. These advanced security features include wireless security (802.11i/WPA2 Enterprise); network security (EAP authentication and certificate support); communication security (SSH functionality and fully encrypted data tunnels); and device security (multi-level encryption capability to protect configuration data).

### SpeedLink™ Roaming

The latest AirborneM2M™ SpeedLink™ roaming feature further enhances the high level of connection reliability. SpeedLink™ enables AirborneM2M™ devices to roam quickly and freely throughout a wireless network without losing important data. If you're walking around a hospital or driving through a warehouse, SpeedLink™ ensures you stay connected.
