

The Milestone open platform enables users to integrate custom, best-in-class security solutions with surveillance, such as access control, mobile devices and video analytics. The Milestone Paxton Integration Solution combines Paxton Access Net2 access control monitoring with market-leading XProtect® video management software (VMS).

The Milestone Paxton Integration Solution integrates directly into XProtect® Smart Client, the powerful application for viewing and controlling cameras in all XProtect VMS systems. The integration solution allows users to control access and monitor video from one unified interface, eliminating the need to run two separate applications for daily monitoring and control.

The solution is available in two editions: Standard and Advanced. Both editions of the Milestone Paxton Integration Solution capture critical events from the Paxton Net2 server and present them as alarms in XProtect Smart Client. The alarms are automatically linked to relevant video footage from corresponding cameras. Users gain seamless control of cameras in their surveillance system based on Paxton door events, such as starting/stopping recording, changing video frame rate and moving the camera to focus on a door.

The Standard edition links video footage and access control events from the Paxton Net2 access control system for prompt investigation of security breaches and export of video sequences. The Advanced edition provides additional functionality, such as advanced alarm handling and quick graphical overview of the various access points based on the map function in XProtect Smart Client. This enables the security operator to see the status of individual doors and remotely operate them directly from the map in XProtect Smart Client.

Streamline security surveillance by integrating the Milestone Paxton Integration Solution into XProtect VMS. The component solution reduces the risk that operators miss important events and enables them to quickly investigate, react to and report critical events. A unified client application combining access control and video surveillance is more efficient and requires less training for new personnel.

System components:

Paxton Net2 Access Control 4.21 or 4.22
XProtect Smart Client 6.0d or newer

Standard edition is available for:

- XProtect® Professional 8.0b or newer
- XProtect® Express 1.0b or newer
- XProtect® NVR 1.0 or newer

Advanced edition is available for:

- XProtect® Corporate 5.0 or newer
- XProtect® Enterprise 8.0c or newer

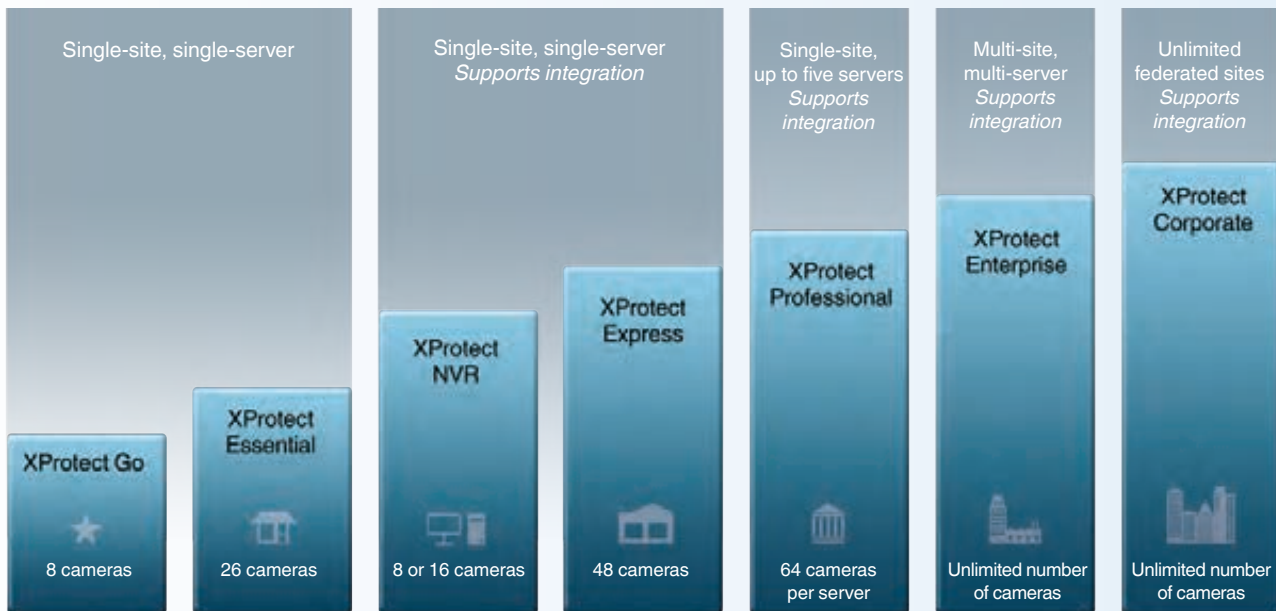

The Milestone Open Platform

A foundation for long-term success

Milestone's XProtect video management software (VMS) is designed with open architecture. It integrates with the industry's widest choice of more than 1,000 IP cameras, encoders and digital video recorders (DVRs) from almost 100 different manufacturers. Committed to providing a true IP video open platform and freedom of choice, Milestone is proud to be among the first VMS vendors to support and lead the future progress of ONVIF and PSIA standards.

Integrate applications and systems into XProtect VMS with the Milestone Integration Platform Software Development Kit (MIP SDK). The open architecture of XProtect, together with the MIP SDK, allows for endless possibilities to add features and functionality for creating powerful, custom surveillance solutions.
