

PC Access™

End-User PC Access. Part#: 1106W

IT'S EVEN EASIER TO PROGRAM A LEVITON AUTOMATION SYSTEM WITH THE LATEST PC ACCESS!

PC Access allows the user to set up, program, and monitor an automation system over a modem or by a serial or network connection. PC Access is the only software product Leviton offers with the ability to program a comprehensive Leviton control system. Registered users receive free updates.

Commands exist for comparing temperatures (indoor vs. outdoor, for example), timers, humidity, thermostat settings and more make innovative energy-saving strategies easier. We've also made it easier for customers to make adjustments to their systems (wake up times, "away" temperatures, holidays, for example) without changing the system's programming. Auto-completion feature allows proficient programmers to type the first few letters of a program line. PC Access jumps to the command, speeding the process.

NEW FEATURES INCLUDE

- Enhanced automation programming:
 - ability to save programs to disk for reuse
 - ability to add comments to programs
 - simplified program editing
 - support for enhanced programming with multiple triggers, conditions and commands in a single statement
- Integrated help and documentation
- Account summary page
- Fewer mouse clicks and keystrokes
- Easy tree-based navigation
- Simplified set up where all names and related properties of an object can be edited on a single page
- All lists can be sorted and/or filtered
- Supports longer, more descriptive, "friendly" names
- Ability to name UPB™ links and other lighting scenes
- Integrated firmware updater for new flash-enabled controllers

Product Requirements

The End User Version supports the Leviton Lumina, Lumina Pro, Omni LTe, Omni Ile, and OmniPro II automation systems. This software package operates using Windows XP and higher (except RT).
