

Extended Reach 10Gig™ SFP+ Direct Attach Active Copper Cable Assemblies

Low Power, Low Latency 10 Gb/s Server Interconnect Solution

As virtualization, consolidation, and convergence initiatives continue to grow, so do the demands placed on the physical infrastructure. To meet the needs for faster processing speeds, low power server inter-connect and I/O consolidation deployments, Panduit offers 10Gig™ SFP+ Direct Attach Active Copper Cable Assemblies.

These active SFP+ copper cable assemblies contain low power circuitry in the connector to boost the signal and are driven from the port without additional power requirements. They provide a low cost alternative to optical transceivers, and are generally used for end of row or middle of row data center architectures for interconnect distances of up to 15 meters (49 feet).

End-to-end High Speed Data Transport (HSDT) solutions from Panduit deliver enhanced availability, agility, and security. Visit www.panduit.com/hsdt to learn more about how these solutions help customers manage risk across their physical infrastructure.

Key Features	Benefits
Low latency performance	Ideal for high performance computer clustering and other latency sensitive applications
Low power active circuitry	Provides a low cost interconnect alternative to optical transceivers that can be driven off the existing port power
Small diameter cable design	Enables proper cable management and improved air flow
Built-in strain relief	Ensures proper bend radius control for reliable deployment
Robust construction	High speed 10 GHz twin-axial cable, with two shielded parallel pairs, factory terminated to SFP+ 10 Gb/s hot pluggable modular connectors; rated to a minimum 250 mating cycles
Variety of extended reach lengths	Available in 3, 5 meters and 7 to 15 (one meter increments) for design flexibility in combination with end of row and middle of row deployment
100% performance tested	Confidence that each assembly delivers specified performance for ensured network availability
Compliant to SFF-8431, SFF-8432 and SFF-8472	Ensuring 10 Gb/s performance when mated to any SFF-8431 SFP+ compliant host port
High density deployment	Robust easy-to-use latching feature allows high density belly-to-belly installation and deployments
Variety of colors	Available in Blue, White and Black for easy identification of multiple networks and fabrics
Part of the Panduit Unified Physical InfrastructureSM solution	Designed to be integrated with Panduit NetAccess™ Cabinets for design flexibility, improved thermal and cable management

Key Applications Include:

- End of Row/Middle of Row Switching architectures
- I/O Consolidation and server virtualization
- Fibre Channel over Ethernet (FCoE)
- 10 Gigabit Ethernet
- 10 GbE High Performance Computer Clusters

Extended Reach 10Gig™ SFP+ Direct Attach Active Copper Cable Assemblies

Technical/Performance Information

Characteristic impedance	100 +/- 5 Ω
Operating temperature	0°C to 70°C (32°F to 158°F)
Non-operating temperature	-40°C to 85°C (-40°F to 185°F)
IEC flame compliance	IEC 60332-3-24
Bend radius	5 x O.D. single time, 10 x O.D. repeated times
Insertion force to cage	18N (4 lbf.) maximum
Withdrawal force from cage	12.5N (2.8 lbf.) maximum
Retention force	90 – 170 N (20 – 38 lbf.)
ROHS status	Compliant
Durability	250 mating cycles minimum
Power per end	0.5 W maximum
