Mini-Com[®] Modular Patch Panels with Faceplates

specifications

Modular patch panels shall consist of a metal panel with molded snap-in faceplates which can be front releasable. Patch panels shall accept all Mini-Com[®] modules for UTP, STP, fiber, or A/V applications and shall mount to standard 19" racks. Patch panels shall be available in 24 and 48-port standard density and 72-port high density. Angled patch panels shall be designed at an optimum angle to help route the cable.

technical information

Mounting options:	Mounts to standard EIA 19" racks or 23" racks with optional extender brackets
Material:	Stamping is CRS and faceplate is ABS
Packaging:	Packaged with appropriate pre-installed snap-in faceplates, a set of mounting screws (#12-24 and M6), and label/label cover where applicable

key features and benefits

Removable faceplates	Allow front accessibility to installed modules for easy moves, adds, and changes
Modular	Accepts all Panduit Mini-Com [®] Modules to mix and match media types in the same panel
Angled design	Allows cable to flow to each side of the rack and minimizes the need for horizontal cable managers by enabling patch cords to be routed directly into vertical cable managers which leads to increased closet density
Recessed design	Eliminates patch cord interference with cabinet doors and improves bend radius protection
Optional label	Available with and without labels to accommodate various needs
Optional strain relief bars	Help support and manage cables
Optional filler panels	Fill unused rack openings to provide a clean and consistent look
High density	More modules per rack space

applications

Mini-Com[®] Modular Patch Panels are ideal for multi-media applications; they accept all Mini-Com[®] Modules, which can be accessed through the front of the panel to snap in and out for easy moves, adds, and changes. Various styles and port densities available to fit most needs; labeling feature available on select styles. Angled patch panels are available for applications in which rack space is limited. The design allows cable to flow to each side of the rack, minimizing the need for horizontal cable managers and increasing the density of the rack space.
