

GE3-24 24 V Strobes and Horn Strobes

www.boschsecurity.com

- Silence the horn while strobes flash
- Use the SuperSlide feature for easy testing
- Wide voltage range; 16 to 33 VDC or FWR
- Many candela choices
- Select high or low frequency, high or low volume, and temporal Code 3 or continuous tone pattern

The Gentex Commander³ 24 V Low-frequency Strobes (GES3-24) and Horn Strobe (GEC3-24) combinations offer dependable alarms, a low current draw, and a minimum flash rate of 1 Hz regardless of input voltage.

Functions

Easy Installation and Testing
The user can wire then install the entire system, reducing installation and operating costs. Use the SuperSlide feature to test supervision.

Horn Output
The horns provide a selection of high or low dBA. They produce a peak sound of 100 dBA or greater at 10 ft (3 m).
The horn offers a choice between a 2400 Hz (remote signaling) tone or a low frequency mechanical sounding (evacuation) tone where closed doors could prevent hearing the other tone. The user can also select either continuous or temporal Code 3 tone output, and synchronize the temporal signal by using an AVS Series Synchronization Module.

Strobe Output
Select from 15 cd, 30 cd, 60 cd, 75 cd, or 110 cd while in the field using a sliding switch. The horn strobe appliance with the AVS44, AVSM, or a compatible

control panel can silence the audible signal while leaving the visible signal energized with the use of a single pair of power wires.

Installation/configuration notes

Compatible Products
The following products are compatible with the GEC3-24 Horn Strobes and GES3-24 Strobes:

Category	Product ID	Product Description
Control Panels	D7022 ¹	Conventional FACP
	D7024 ²	Addressable FACP
	D7024	Conventional FACP
	D8024 ³	Analog FACP
	D9124 ³	Addressable FACP
	D10024A ³	Analog FACP
	FPD-7024 ²	Addressable FACP
Modules	FPD-7024	Conventional FACP
	AVS-44	Synchronization module (red)
	AVS44-W	Synchronization module (white)
	AVSM-R	Synchronization module (red)
	AVSM-W	Synchronization module (white)

¹ The D7022 must be set for 24 VDC operation and requires the AVS44 or AVSM Synchronization Modules for synchronization.

² When used with a D7039 Multiplex Expansion Module, the FPD-7024 and D7024 become addressable FACP.

³ For synchronization, use the AVS44 or AVSM Synchronization Modules with these control panels.

Mounting Considerations

Notice

Use the GE3-24 horns and horn strobes for indoor installations only.

These strobes and horn strobe combinations are equipped with a four-inch square metal mounting plate that can be attached as follows:

	Conduit Applications	Surface Mounted	Semi-flush Mounted
Single-gang	•		•
Double-gang	•	•	•
Four-inch square	•	•	•
GSB	•	•	

Also included is a locking mechanism that secures the product to the bracket without any screws showing.

Shipping Information

The GEC3-24 horn strobe models are delivered from the factory set to the temporal lower frequency mode.

Wiring

Notice

Do not use these units in coded or pulsed signaling circuits.

The input terminals accept wires with diameters between 18 AWG and 12 AWG (ISO 0.75 mm² and 4 mm²).

* If you operate the horn in this mode at this voltage, it does not meet the UL reverberant sound level required for public mode fire protection service. These settings are acceptable only for private mode fire alarm use. Use the high output setting for public mode application.

Notice

The sound output for the temporal (Code 3) tone is rated lower because the time the horn is off is averaged into the sound output rating. When the horn is producing a tone in the Temporal mode its sound pressure is the same as the Continuous mode.
