MDF 110D BLOCK MOUNTING SYSTEM 19" & 23"

The CPI 110D Block Mounting System provides high-density, space-saving 110D style block mounting for both 100 and 300 pair 110D style blocks. The 4.25"W and 3"D cable support troughs along with the 3" W and 6.25"D vertical cabling rings provide capacity for the large cable bundles needed for maximum termination density. The basic frame, support troughs, cable tray, vertical cabling rings and horizontal support channels are available under one part number. The 110D Block Mounting System ships completely assembled for quick, easy installation. For an out-of-the-box solution to high density 110D style block termination, order the new CPI 110D Block Mounting System.
