

Sarix® IM10LW Series IP Mini Domes with SureVision

INDOOR, 1.2 MPX, H.264, WDR, AND LOW-LIGHT PERFORMANCE

Product Features

- Up to 1.2 Megapixel (MPx) Resolution (1280 x 960)
- Up to 30 Images per Second (ips) at 1280 x 720
- Advanced Low-Light Capability
- Wide Dynamic Range with Anti-Bloom Technology
- Day/Night with Mechanical IR Cut Filter
- Compact Size with 3-Inch Bubble
- Auto Focus Varifocal 2.8 ~ 10 mm Megapixel Lens
- Easy Installation
- H.264 and MJPEG Compression
- Sensitivity Down to 0.0013 lux
- Line-in and Line-out Audio with Built-in Microphone
- Power over Ethernet (PoE), IEEE 802.3af Class 2
- Web Viewing
- Open IP Standards
- Adaptive Motion Detection

The **Sarix® IM10LW Series** is a 1.2 MPx IP indoor fixed dome camera designed with SureVision technology. SureVision seamlessly delivers advanced low-light capability, wide dynamic range (WDR), and anti-bloom technology for industry-leading image quality. The network indoor fixed camera includes a mechanical IR cut filter and anti-bloom technology for increased sensitivity in low-light installations. Anti-bloom technology adjusts the image to create the best picture when a bright light source is introduced in a dark scene, for example the glaring head lights of nighttime traffic.

Sarix technology defines the next generation of video security imaging performance, delivering high definition (HD) resolution, advanced low-light capabilities, consistent color science, and fast processing power. The H.264 compression video files are considerably smaller making HD video more affordable.

Fixed Dome Camera

The **IM10LW Series** contains an integrated varifocal 2.8 ~ 10 mm megapixel autofocus lens. All models include a camera in a compact indoor enclosure that is ready to install.

The **IM10LW Series** supports two simultaneous video streams. The two streams can be compressed in MJPEG and H.264 formats across several resolution configurations. The streams can be configured in a variety of frame rates, bit rates, and group of pictures (GOP) structures for additional bandwidth administration.

- ONVIF v1.02 Conformant
- Ability to Control and Monitor Video Over IPv4 and IPv6 Networks

Built-In Analytics

The **Pelco Camera Sabotage** and **Adaptive Motion Detection** behaviors are standard features of the IM10LW Series. **Camera Sabotage** detects contrast changes in the field of view. An alarm is triggered if the lens is obstructed with spray paint, a cloth, or covered with a lens cap. **Adaptive Motion Detection** tracks objects that enter the field of view and triggers an alarm when an object enters a user-defined zone.

Web Interface

The **IM10LW Series** uses a standard Web browser for powerful remote setup and administration.

Window Blanking

Window blanking is used to conceal user-defined privacy areas that cannot be viewed by an operator. The **IM10LW Series** supports up to four blanked windows. A blanked area will appear on the screen as a solid gray window.

Video Systemization

The **IM10LW Series** easily connects to Pelco IP and hybrid systems such as Endura® version 2.0 (or later), Digital Sentry® version 7.3 (or later), and Digital Sentry NVs. The camera also features open architecture connectivity to third-party software. Pelco offers an application programming interface (API) and software developer's kit (SDK) that enables third-party systems to interface with Pelco's IP cameras.
