## Interfaces

### Brand Features

PC Access features set up, programming, and monitoring of a home control system over a modem or by a serial or network connection. PC Access is the only software product Leviton Security & Automation offers that has the ability to program a Leviton Security & Automation automation system. It also fully integrates with Leviton Security & Automation Automation Studio software.

New commands for comparing temperatures (example: indoor vs. outdoor), timers, humidity, thermostat settings, and more make innovative energy-saving strategies easier. Leviton Security & Automation has also made it easier for customers to make adjustments to their systems (altering wake-up times, "away" temperatures, holidays) without changing the system's programming.

With the auto-completion feature, PC Access speeds the programming process by jumping to a command after the first few letters of a program line are typed.

### Item Description

Lumina Pc Access Software

### Features and Benefits

- Enhanced automation programming features include:
  - Multiple triggers, conditions, and commands in a single statement
  - Save programs for reuse
  - Add comments to programs
  - Simplified program editing
  - Search and replace
  - ZIP code wizard
  - Account summary page
  - Easy tree-based navigation
  - Fewer mouse clicks and keystrokes
  - Integrated help and documentation
  - All lists can be sorted and/or filtered
  - Supports longer, more descriptive "friendly" names
  - Ability to name UPB™ links and other lighting scenes
  - Integrated firmware updater for new flash-enabled controllers
  - Simplified set up: names and properties of an object edited on a single page
