Brand Features

Omni-Bus is a distributed control system for lights, shades, fans, shutters, pumps, and more. Utilizing the worldwide DIN rail standard for mounting, Omni-Bus controls CFL, LED, electronic low voltage, Halogen, and incandescent lighting. Output devices are rated for 110/220/240V 50-60Hz markets unless otherwise noted. All wall stations are 24VDC and below. Modular Omni-Bus components can be located where needed to save wiring and installation costs. Elegant, multi-button programmable wall stations eliminate the expense of in-wall high voltage wiring to multi-way switches.

Item Description

Omni-Bus Keyfob Remote Control, 6-Channel

Features and Benefits

- Wireless RF transmitter built into a convenient keyfob
- Up to 6 channels available
- Controls dimmer, power switch, relay, or inputs into Leviton Security & Automation controller
