

# 39A00-3

## Brand Features

Enables communication between UPB devices on a three-phase 120/208VAC delta-wye, 60Hz electrical system. The main purpose of the Three-Phase Repeater is to transfer UPB multi-packet messages transmitted on one phase (leg) of the electrical system and strongly repeating them on to the other phases (legs) to ensure proper communication. The Three-Phase Repeater is perfect for 3-phase environments including offices, condominiums, and additional small businesses and medium density apartments.

## Item Description

UPB Three-Phase Repeater.

## Features and Benefits

- Enables communication between UPB devices on a three-phase 120/208VAC delta-wye, 60Hz electrical system
- Required for use in three-phase installations when UPB devices are installed on separate phases
- The main purpose of the Three-Phase Repeater is to transfer UPB multi-packet messages transmitted on one phase (leg) of the electrical system and strongly repeating them on to the other phases (legs) to ensure proper communication
- The Three-Phase Repeater is perfect for 3-phase environments including offices, condominiums, and additional small businesses and medium density apartments
