Communication Center

Brand Features

The Cellular Communication Center (C3) is a wireless cellular communicator that allows phone calls to be made over the GSM cellular network using the existing telephones in your home. This device will work with virtually any security system to ensure communication to a central monitoring station, even if the landline is unavailable. The C3 can even be used when there is no landline in your home, utilizing the GSM network instead, great for rural locations and more modern construction. Complete two-way communication allows dial in and dial out.

Item Description

Cellular Communication Center (C3).

Features and Benefits
