WPP-531-D-ST SPECIFICATIONS

HANDSFREE SPEAKERPHONE WITH PUSH-BUTTON AUTODIAL & BLUE STROBE LIGHT IN A WEATHERPROOF HOUSING

Distinctly noticeable blue light emergency handsfree speakerphone for both indoor and outdoor locations. Constructed with a stainless steel panel phone and a cast aluminum weatherproof black housing with TELEPHONE on door with pin latch, wall or pole mount, and flashing strobe light that will activate when user makes a call. Designed to automatically dial a preprogrammed number from 1-11 digits when the button is pushed and red/green LED light provides visual indication of call progress. Capable of dialing a PBX or access number, block or allow incoming calls, and provides call duration time-out from 1-9 minutes or no time-out. Telephone can not be left off-hook, as it detects when called party hangs up and resets itself. ADA (American Disability Act) features available. Blue light option is also available in a steady burning light (-SB) for location identification or a flashing blue light that activates when an incoming call is received (-RST). Waterproof enclosures are offered in black, (-R) red, (-Y) Yellow, or (-G) Gray with TELEPHONE or EMERGENCY on door.

SPECIFICATIONS

Weatherproof Housing:	9 1/2"W x 19 5/8"H (Including the light) x 8"D (Including Door)
Weight:	Approximately 19 lbs.

Mounting Instructions:	Weatherproof Housing
	  4 holes spaced 8" x 5 7/8"
	  Also available pole mounting bracket

Environment:	Temperature: -30°C (-22°F) to 60°C (140°F) Humidity: 0%-90% non-condensating
Programming:	Via DTMF Keypad
Input Power:	Telephone Line Powered
Loop Current:	30mA min to 80mA max
Impedance:	600 ohms
Type Jack:	RJ11C
Ringer Equivalency:	0.4A
UL & FCC Registration:	Certified
ACCESSORIES:	301-064 Security Tool **(required for installation)**
