

WPP-531-FD-ST SPECIFICATIONS

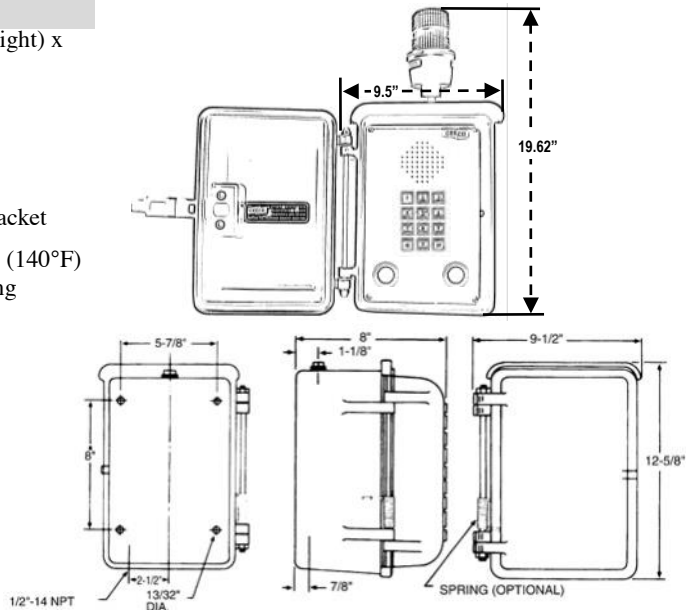

HANDSFREE SPEAKERPHONE WITH KEYPAD, PUSH BUTTON AUTODIAL & BLUE STROBE LIGHT IN A WEATHERPROOF HOUSING

Distinctly noticeable blue light emergency handsfree speakerphone for both indoor and outdoor locations. Constructed with a stainless steel panel phone and a cast aluminum weatherproof black housing with TELEPHONE on door with pin latch, wall or pole mount, and flashing strobe light that will activate when user makes a call. Designed with a keypad for dialing and an autodial button. Push button to initiate call and red/green LED light provides visual indication of call progress. Telephone can be programmed with call restrictions, ability to dial a PBX or access number, allow or block incoming calls, provide call time-out from 1-9 minutes or no time-out. Autodial button dials a preprogrammed number from 1-11 digits. Telephone can not be left off-hook, as it detects when called party hangs up and resets itself. Equipped with a marine quality chrome tone dial keypad, weatherproof, puncture resistant speaker and microphone and tamper resistant security screws. ADA (American Disability Act) features available. Blue light option is also available in a steady burning light (-SB) for location identification or a flashing blue light that activates when an incoming call is received (-RST). Waterproof enclosures are offered in black, (-R) red, (-Y) Yellow, or (-G) Gray with TELEPHONE or EMERGENCY on door
