Enclosure Power Management Solutions

InfraPower[™]

Enclosure Power Management Solutions

Temperature & **Humidity Sensors** Infra Kower A pair of sensors can be connected to one single W series PDU meter. Temperature or Temperature & Humidity (2in1) external sensors are available with 2M or 4M cord.

Sensors have a low profile design with magnetic base for easy affixing to the cabinet/rack.

PHASE also available

IP Dongle - SNMP

Hot pluggable IP dongle provides IP remote access to the PDUs using a

Only **one IP dongle** is required to access a maximum of **16 PDUs in a daisy chain.**

PDU, then the entire daisy chain group can

Field Replaceable Meter (W Models)

The PDU features a field replaceable RMS current meter with 3" colour LCD display with touch screen functionality. The sharp and highly visible display provides local data of current (AMP), voltage (Volt), power (KW), energy consumption (KWh), power factor of the entire PDU. This data has a **metering** accuracy to within +/- 1%.

In addition the module features 2 x environmental plug in ports for temperature and humidity monitoring; all data is then displayed locally on the PDU.

The **field replaceable** 3" display helps eliminate maintenance downtime by simply replacing a possible defective meter without a service interruption. The display will be positioned at top of the PDU.

Coloured Chassis:

Coloured PDU casings provide a simple way to enhance cable management and visualisation of the power sources. It allows differentiation of power feeds (A & B) if required.

The most common combinations are Red & Blue or Black & Grey White. Other colours including Yellow, Green, Orange and Purple are available.

Accidental Release Sleeves

The sleeve slides over the C14 or C20 plug and then the combined plug + sleeve fits directly into the PDUs C13 or C19 outlet.

Multiple Outlet Configurations

W Series PDUs are available with multiple For example: One Vertical PDU with 2xUK. 20xC13, 4xC19 outlets

Need help on determining your outlet configurations? Speak to our Power experts +44 (0)2380 529303 / sales@austin-hughes.eu

Power Feed Entry Flexibility

equipment from unplanned downtime, socket switching must be controlled via bistable/ latching relays.

Ensuring an 'always on' operational performance and socket status returning to a pre power outage after a planned or unplanned shutdown.

Thermal Resettable Fuse

- Protected load segments for increased reliability
 Overload reset button
- Cost effective solution for safety

Or chose to have Circuit Breakers

- Protected load segments for Overload switch
 Designed with fully shrouded
- protective cover to prevent accidental ON / OFF operation

As standard InfraPower PDUs have bottom power feed entry Customisation to top feed power entry is available on request

InfraPower Manager Software (FREE)

Ultra density PDU Management can be achieved with InfraPower for W Series PDUs. Supporting remote management of multiple PDU daisy chain groups.

- IPM-04: supports up to 720 PDU's (45 PDU Groups)
- IPM-04 provides the basic functions of:
- Monitoring or measurement of Amps, Volts, kW, kWh, Power factor and Temperature / Humidity
- Remote switching ON / OFF per individual power outlets
- Reporting
- Alarm setting

- PDU Outlet measurement
- Grouping and chart reporting (These functions are provided by higher software editions)

InfraPower Manager enhances the benefits of W Series PDUs by delivering a centralised remote management platform for the PDUs in multiple IP-access groups.

The administrator can remotely manage the PDUs and the environmental sensors connected by the web browser.

- Wide functionality
- Concise monitoring pages
- Mass scale PDU management
- Scalable solution
- Flexibility by multiple users
- Cost effective

Mounting

- Quick and tool-less integration simplifies PDU installation.
- Universal mounting kits supports all cabinet models.
- Vertical Button Mounting Kit: Designed for global branded cabinets with keyhole type mounting holes on the rear verticals
- Vertical Bracket Mounting Kit: Easy installation by mounting the PDU to the cabinet cable tray
- Both a Vertical Button Mounting Kit & Vertical Bracket Mounting Kit are supplied as standard per PDU.

Vertical Button **Mounting Kit**

Vertical Bracket Mounting Kit
