MODEL NUMBER: **0SU22182**

Description
Save Space and Money

The Smart 116 SPU is a single-user analog Cat5 KVM switch that gives you the ability to control multiple computers or servers from a single keyboard/video/mouse console. The rack mountable, 1U-sized switch features innovative ROC (RICC on cable) dongle technology that directly connects you to each server in the rack, eliminating cable clutter and the need for multiple consoles.

Whatever the application, a company operating several servers can now connect them all to a single keyboard, video and mouse console, and operate them with 30m/100ft of range between the server and switch.
