

Iomnis Server Solutions

iomnis

Quality hardware that's Guaranteed to meet your video surveillance demands.

Iomnis and our world-class partners have teamed up to ensure that best-in-class surveillance products are seamlessly integrated with server, storage, and connectivity solutions. As an industry leading provider of IP hardware, servers and storage, we are so sure you will be satisfied, that we offer a 100% money-back performance guarantee.* Surveillance Performance Index (SPI) ensures that your system performance and storage is optimized. That means you get exactly what you need and won't have to pay for the things you don't.

SPI and the Iomnis Surveillance Portal

Iomnis assigns a performance rating to each of our servers to determine its load handling. This rating is referred to as SPI, or the Surveillance Performance Index.

The Iomnis Portal guides users through the Optimizer – a tool that analyzes video surveillance package specifications and other technical details. The result is an SPI requirement number which is assigned to the entire system build. The final output includes a recommendation for the most cost effective server that meets or exceeds the SPI requirement.

This patented tool simplifies the quoting process and dramatically reduces the time needed to aggregate product specs and pricing. The professional looking output can be immediately sent to customers in a fraction of the time of traditionally generated quote and specification documents. What's more, the Iomnis guarantee means you'll never get left holding the bag!

- Optimizer: Fast. Efficient. Guaranteed.
- Assembly Line: Drag. Drop. Design.
- Vault: Collaborate. Organize. Protect.

Using the Iomnis Portal is easy, it's free and comes with zero obligation. Visit www.iomnisportal.com today to sign up.

- Intuitive and Easy to Use
- Reduces Quote Time up to 70%
- Professional Outputs with BOM
- CAD, Excel, and PDF Exports
- SPI Certified Certificate Generation
- Provides Guaranteed Results
- Request Project Quotes on-line
- Save your Project builds on-line

*Guaranteed if configured using www.iomnisportal.com
Patent# US 8,787,201 B2

Solutions Overview

Optimized. Reliable. Guaranteed. The Iomnis series servers are rigorously optimized, tested and inspected, ensuring your product is right the first time. The 3 and 5 year hardware warranty with next business day on-site service make Iomnis the easy choice for surveillance hardware.

PRO340 Series Server

Professional Line Servers

- Small-Medium Deployments
- Intel Based
- Up to 8TB
- Latest Microsoft OS
- Dual-Monitor Graphics
- Available in Rack-Mount

ION Series

VMS Bundled Solution Servers

- Small-Medium Deployments
- Analog Camera Support
- Dual Display
- Intel Based
- Small Form Factor
- Pre-installed OnSSI OC-PS

ION XS Series

VMS Bundled Solution Servers

- Small-Medium Deployments
- Dual Display
- 1TB Storage
- Intel Based
- Small Form Factor (4" x 4")
- Pre-installed OnSSI OC-PS

IR390 Series

Enterprise Line Servers

- Small-Medium Deployments
- Intel Xeon
- 1RU (1.75 inch) Height
- Scalable to 276TB
- Latest Microsoft Server OS
- *[IT390 Tower Version Avail.]

IR590 Series

Enterprise Line Servers

- Medium-Large Deployments
- Dual Intel Xeon
- 2RU (3.5 inch) Height
- Scalable to 292TB
- Latest Microsoft Server OS

IR790 Series

Enterprise Line Servers

- Large Deployments
- Dual Intel Xeon
- 2RU (3.5 inch) Height
- Scalable to 308TB
- Latest Microsoft Server OS

VS Series

Viewing Stations

- 2, 4, 6, or 8 Displays
- Up to 4K Resolution
- Intel Based
- Tower or Rack Mount
- Latest Microsoft OS

SAN Solutions

High Speed Storage Devices

- TB, PB & EB Storage Virtualization
- Continuous Snapshots
- Thin Provisioning
- Automated Tiered Storage
- High Availability
- Remote Replication
- Green Architecture

ION by Iomnis

Network Switches

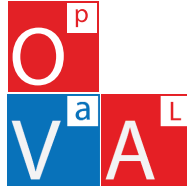

- ION-S2108P (PoE+ Supported) 8-Port GB Smart, 130W PoE Budget
- ION-S21024P (PoE+ Supported), 24-Port GB Layer 2, 370W PoE Budget
- ION-S21048P (PoE+ Supported), 48-Port GB Layer 2, 740W PoE Budget
