

AXIS Motion Guard

Robust, installer-friendly motion detection

AXIS Motion Guard is a robust motion detection application designed for general indoor and outdoor installations. The application is ideal for after-hours monitoring of office buildings, retail stores, industrial properties, vehicle depots and other unattended areas where reliable motion detection is needed. The application is easy to set up and configure, with an intuitive user interface, contextual help and smart configuration options.

- > Robust indoor and outdoor motion detection
- > Multiple profiles
- > Intuitive configuration
- > Easy installation

AXIS Motion Guard

Application		System integration
