High-quality 720p HD Hybrid Rapid Dome Camera

- IPELA HYBRID™ Sony IP and analog-over-coax technology*1
- Excellent 720p HD picture quality (1280 x 720 maximum resolution), supporting H.264 at 30 fps (IP)
- Three codecs (H.264, MPEG-4, JPEG) and dual streaming capability
- High-speed 360 degrees endless rotation
- Powerful 28x optical zoom capability*6

KEY FEATURES

- Simultaneous transmission of IP HD video and analog SD video*2
- Maximum cable length of 1,000 feet (300 m) with an RG-59 coaxial cable*3
- The Exmor[™] CMOS sensor delivers high quality images with low noise Exmor
- Above-the-horizon tilt 15°tilt-up, total tilt range of 210° (-105° to +105°)

- 28x optical and total zoom ratio of 336x with 12x digital zoom
- DynaView™ Wide-D technology to capture high-contrast scenes and produce clear images even under challenging lighting conditions

· True Day/Night function to switch to Day or Night mode depending on the light level

- DEPA™ Intelligent Video analytics enables cameras to send not only video images, but related metadata, including object data (size and position) to the DEPA-enabled recorder. Since part of the image processing is done on the camera side, the load to the recorder can be reduced enabling camera expansion
- Powered by HPoE for simple installation
- SD memory card slot for an on-board recording capability*4*5
- Smartphone viewer for accessing the camera from a smartphone
- ONVIF™ (Open Network Video Interface Forum) Version 1.02 software that ensures greater interoperability and more flexibility in building multiple-vendor systems DVIF
- *1 Sony IP and analog-over-coax technology is developed based on Intersil's SLOC™ (Security Link Over Coax)
- *2 For output of IP and analog signals from its SLOC port, the camera must be connected to a SLOC-compatible device via a coaxial cable. The output analog image may not display correctly, depending on the video format and image size settings. For details please contact your nearest Sony office.
- *3 Cable length varies according to cable grade and quality.
- *4 The on-board recording function, the intelligent motion detection function, and the tamper alarm function cannot be used simultaneously.
- *5 Data recorded on an SD memory card may be lost or damaged by data access during power-off, mechanical shock, memory card detachment, or other operations, Data loss or damage can also occur when a memory card reaches end of life, which varies according to operational conditions. No guarantee is given against damage (including passive damage).
- *6 Dual streaming is only available when SLOC is OFF.
