

# SUN Server Interface Module for NetDirector Matrix KVM Switches

MODEL NUMBER: **B054-001-SUN**

## Description

Tripp Lite's SUN Server Interface Module connects to the USB and HD15 ports on a SUN Server, and converts them to a single RJ45 connector. Unit is specifically designed for SUN Keyboard signals. Ordinary Cat5e patch cables can then be used to connect the server to the switch ports on a Tripp Lite B060-032 or B060-016-2 NetDirector Matrix KVM switch. Use of Cat5e cables frees up space in the server cabinet that would be filled by traditional, thicker KVM cables. Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

## Features

- Eliminates the need for thicker, heavier KVM cables
- Compact, lightweight design
- Plug and Play; no software required
- No power supply required
- Allows a Server/CPU to be located up to 500ft away from the KVM switch
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

## Highlights

- Needed to connect a SUN computer/server to a B060-032 or B060-016-2 NetDirector Matrix KVM switch via Cat5e cable
- Easy to install; no software needed
- Allows a maximum distance of 500ft from KVM to Server via Cat5e cable
- Compact and lightweight design
- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases

## System Requirements

- SUN Server or CPU with a HD15 connector and USB connector
- A B060-032 or B060-016-2 NetDirector Matrix KVM Switch
- Cat5e/6 cable; up to 500ft

## Package Includes

SUN Server Interface Module
