

QuickNet™ Cassette Cable Manager and Patch Field Protection Cover

specifications

The fiber cassette rear cable manager (FQCRCM) organizes MTP® interconnect cable and traditional fiber cable for SFQ (Small Form-factor QuickNet™) series MTP® fiber optic cassettes, HDQ (High-Density QuickNet™) series high density fiber optic cassettes, and pre-terminated cable assemblies with cassettes. The cassette rear cable manager mounts to the rear of a standard EIA 19" wide telecommunications rack and provides a secure location to support a maximum of sixteen MTP® interconnect cable assemblies. Interconnect cables and traditional fiber cables shall be secured with fiber management spools.

The fiber patch field protection cover (FPFPC1) hides and protects the front patch field and shall minimize the potential for connector damage and fiber attenuation. The labeling card identifies ports and d-rings provide physical support and route fibers into the vertical manager.

technical information

Dimensions: 1.40"H x 19.0"W x 9.56"D (35.7mm x 482.6mm x 242.9mm) (cassette rear cable manager) 1.72"H x 19.38"L (43.71mm x 492.25mm) (patch field protection cover)

Mounting options: Mounts to standard EIA 19" racks

key features and benefits

Cassette Rear Cable Manager (FQCRCM)

Rear mounting design

Provides easy access to fiber cable; rear mounting design conserves data center floor space by reducing or eliminating the need for horizontal cable managers; occupies less than 1 RU space

Fiber management spools

Improved fiber protection, ease of maintenance, and enhanced cable management; manages rear fiber cable slack and provides for fiber cable routing guide; fiber management spools organize cables for optimum finished appearance

Modularity

Offers flexibility by accommodating QuickNet™ MTP® Interconnect Cable and traditional fiber cable; for use with QuickNet™ SFQ Series MTP® Fiber Optic Cassettes, QuickNet™ HDQ Series High Density Fiber Optic Cassettes, and QuickNet™ Pre-Terminated Cable Assemblies with Cassettes

Fiber Patch Field Protection Cover (FPFPC1)

Front post installation

Hides front patch field, protects front patch field. Mounts into a variety of Panduit Racks and Cabinets including 2-post and 4-post racks, Net-SERV and Ne-Access cabinet and directly supports Opticom, MiniCom, and QuickNet FAPs, Adapter Panels, and Cassettes

Labeling card and d-rings

Identifies patch field for optimum organization. D-rings provide physical support to fiber, and routes fiber into vertical manager

applications

The SFQ cassette rear cable manager is used to support and manage MTP® Interconnect Cable and traditional fiber cable. It provides strain relief, bend radius control, superior aesthetics, and improved organization and routing of cables. The QuickNet™ Cassette Rear Cable Manager is less than 1 RU high, and is designed to support MTP® Interconnect Cable from up to sixteen QuickNet™ SFQ Cassettes or up to two QuickNet™ HDQ Cassettes installed in 2 RU space. The QuickNet™ Cassette Rear Cable Manager installs on the rear of a standard EIA 19" rack.

QuickNet™ Fiber patch Field Protection Cover mounts into a variety of Panduit Racks and Cabinets including 2-post and 4-post racks, Netserve and NetAccess cabinets. Directly supports Opticom, MiniCom, and QuickNet FAPs, Adapter Panels, and Cassettes. Protects front patch field and minimizes the potential for connector damage and fiber attenuation. The QuickNet Cassette Rear Cable Manager and Fiber Patch Field Protection Cover contribute to network integrity and reduce time and cost associated with cable routing and maintenance.
