FutureCom™ E Patch Cord, FRNC, RJ45 - RJ45 connector

black / red, 2 m

The black FutureCom™ Cat.6 patch cords with 2x RJ45 plugs in compliance with IEC 60603-7-5 Ed.1.0 provide transmission performance according to Category 6 specifications of ISO/IEC 11801 Ed.2.2 and EN 50173 (series).

FutureCom cables are low skew products, i.e. the difference in propagation delay between the individual pairs is very low, an increasing requirement for Gigabit Ethernet. The suitability of the cable for high-bit-rate transmission systems ensures a high degree of future proofing throughout the system.

The RJ45 connectors are fully assigned and hence application independent. Additional features are the slim design and low weight of the flex cables. Each pair is individually shielded with foil (FTP). FutureCom™ Cat.6 patch cords provide additional latch protection through the different coloured boot options available.

Features

- RJ45 to RJ45 according to IEC 60603-7-5 (2010-04) Ed. 2.0
- Application independent, all four pairs terminated
- Halogen-free (LS0H/LSZH), flame-retardant
- Coloured latch protection
- Supports Gigabit Ethernet
- Category 6 component
