

Model 1006-CCOAP

Right-Angle WAP Wall Bracket for Cisco APs

Category: Wall and Hard Ceiling - Surface Mount - Right-Angle Brackets

Many WAP manufacturers recommend WAPs be mounted in a horizontal orientation. Secure APs from most manufacturers in areas where wall mounting may be required, such as residence halls, hotels, and other hard lid venues. The WAP is partially recessed into the right-angle bracket, exposing only the antenna face of the AP. Conduit, raceways, and cable can be terminated in the bracket. The WAP can be locked in place using the manufacturer's locking features. Specify AP and model when ordering.

Patent pending

Features & Benefits

- Conveniently install wireless APs on walls and above ceilings
- Enables wireless access points to be mounted in preferred horizontal orientation
- AP is partially recessed into bracket, providing aesthetic appearance
- Can be mounted directly over telecommunications outlet

Technical Specifications

- Design: Right-angle mounting bracket for securing wireless access points on walls. Designed to mount the access point in the preferred horizontal orientation. For Cisco 2700, 3600, 3700 APs.
- AP is partially recessed into bracket, providing aesthetic appearance
- For Cisco APs, use AIR-AP-BRACKET-2
- Construction: 12 ga. white powder-coated steel
- Size: 11 inches by 11 inches by 2.5 inches (280mm by 280mm by 64mm)

Configurations

Model Number Guide:

Model Number	Designed for AP Model
1006-CCOAP	Cisco 2600/3600/3700 APs
1006-CCOAP3800	Cisco 2800/3800 APs
1006-HLA	Cisco AP with hyperlocation antenna
1006-AP225	Aruba Networks AP225
1006-AP325	Aruba Networks AP325

Measurements *(Maximum values):*

- Height: 2.5 in.
- Width: 11 in.
- Depth: 11 in.
- Item Weight: 4 lbs.
- Shipping Weight: 6 lbs.

Includes

- (1) Right-Angle Bracket
- (1) AP mounting plate
- (1) Installation instructions
