# SAFETY DATA SHEET

1/20

# ARALDITE® 2014-1 GB HARDENER

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Product name : ARALDITE® 2014-1 GB HARDENER

Registration number : Not available.

Product code : 00074050

Product description : Mot available.

Other means of : Mot available.

identification

1.2 Relevant identified uses of the substance or mixture and uses advised against

**Product use** : Hardener for adhesive systems

1.3 Details of the supplier of the safety data sheet

**Supplier**: Huntsman Advanced Materials (Europe)BVBA

Everslaan 45

3078 Everberg / Belgium Tel.: +41 61 299 20 41 Fax: +41 61 299 20 40

e-mail address of person responsible for this SDS

: Global\_Product\_EHS\_AdMat@huntsman.com

E-mail address to request full REACH registration number upon EU member State

Authority request:

REACH\_Registration\_Nr\_AM@huntsman.com

1.4 Emergency telephone number

**Supplier** 

Telephone number : EUROPE: +32 35 75 1234

France ORFILA: +33(0)145425959

ASIA: +65 6336-6011 China: +86 20 39377888 India: +91 22 4050 6333 Australia: 1800 786 152 New Zealand: 0800 767 437 USA: +1/800/424.9300

# **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Skin Irrit. 2, H315 Eye Dam. 1, H318 Skin Sens. 1, H317

Ingredients of unknown :

toxicity

Ingredients of unknown :

ecotoxicity

Classification according to Directive 1999/45/EC [DPD]

The product is classified as dangerous according to Directive 1999/45/EC and its amendments.

ARALDITE 2014-1 GB HARDENER 2/20

**Date of printing** : 22 February 2013 **(M)SDS no.** : 00074050

Date of issue : 22 February 2013 Version : 2

**SECTION 2: Hazards identification** 

Classification : T; R23

Xi; R41, R38

R43

Human health hazards : Toxic by inhalation. Risk of serious damage to eyes. Irritating to skin. May cause

sensitisation by skin contact.

Additional information : According to Directive 99/45/EC, Article 6, Paragraph 1b, classification derived from

direct toxicological testing of the preparation take precedence over classification

derived from using the conventional (calculation) method.

See Section 16 for the full text of the R phrases or H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Hazard pictograms

Signal word : Danger

Hazard statements : Causes serious eye damage.

Causes skin irritation.

May cause an allergic skin reaction.

**Precautionary statements** 

General : Not applicable.

Prevention : ₩ear protective gloves: > 8 hours (breakthrough time): butyl rubber, Ethyl Vinyl

Alcohol Laminate (EVAL). Wear eye or face protection. Avoid breathing vapour.

Response : IF IN EYES: Rinse cautiously with water for several minutes. Immediately call a

POISON CENTER or physician.

Storage : Not applicable.

Disposal : Dispose of contents and container in accordance with all local, regional, national

and international regulations.

Hazardous ingredients : polyamide resin

N(3-dimethylaminopropyl)-1,3-propylenediamine

Supplemental label

elements

: Not applicable.

Special packaging requirements

Containers to be fitted

with child-resistant

fastenings

: Not applicable.

SECTION 3: Composition/information on ingredients

Tactile warning of danger : Not applicable.

2.3 Other hazards

Other hazards which do : Mone known.

not result in classification

3.2 Mixtures : Mixture

ARALDITE 2014-1 GB HARDENER 3/20

**Date of printing** : 22 February 2013 (M)SDS no. : 00074050

Date of issue : 22 February 2013 Version : 2

# **Type**

- Substance classified with a health or environmental hazard
- [2] Substance with a workplace exposure limit
- [3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII
- [4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII
- [5] Substance of equivalent concern

#### Other means of identification

REACH Product name	CAS no.	Other	CAS no.
Tatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine	68082-29-1	polyamide resin	

ARALDITE 2014-1 GB HARDENER 4/20

**Date of printing** : 22 February 2013 (M)SDS no. : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact

: Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.

Inhalation

: Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Skin contact

: Get medical attention immediately. Call a poison center or physician. Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.

Ingestion

: Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

**Protection of first-aiders** 

: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

# 4.2 Most important symptoms and effects, both acute and delayed

# Potential acute health effects

**Eye contact**: Causes serious eye damage.

Inhalation : May give off gas, vapor or dust that is very irritating or corrosive to the respiratory

system. Exposure to decomposition products may cause a health hazard. Serious

4/20

effects may be delayed following exposure.

**Skin contact**: Causes skin irritation. May cause an allergic skin reaction.

**Ingestion**: May cause burns to mouth, throat and stomach.

Over-exposure signs/symptoms

**Eye contact**: Adverse symptoms may include the following:

pain watering redness

Inhalation : No specific data.

**ARALDITE 2014-1 GB HARDENER** 5/20

Date of printing : 22 February 2013 (M)SDS no. : 00074050

**Version Date of issue** : 22 February 2013 : 2

# **SECTION 4: First aid measures**

Skin contact : Adverse symptoms may include the following:

pain or irritation

redness

blistering may occur

Ingestion : Adverse symptoms may include the following:

stomach pains

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician : In case of inhalation of decomposition products in a fire, symptoms may be delayed.

The exposed person may need to be kept under medical surveillance for 48 hours.

**Specific treatments** : Symptomatic treatment and supportive therapy as indicated. Following severe

exposure the patient should be kept under medical review for at least 48 hours.

# SECTION 5: Firefighting measures

#### 5.1 Extinguishing media

Suitable extinguishing

media

: Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing

media

: None known.

#### 5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture : In a fire or if heated, a pressure increase will occur and the container may burst.

**Hazardous thermal** decomposition products

: Decomposition products may include the following materials: carbon dioxide

carbon monoxide nitrogen oxides sulfur oxides metal oxide/oxides

#### 5.3 Advice for firefighters

Special precautions for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without

**Special protective** equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

# SECTION 6: Accidental release measures

# 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is

5/20

inadequate. Put on appropriate personal protective equipment.

For emergency responders: If specialised clothing is required to deal with the spillage, take note of any

information in Section 8 on suitable and unsuitable materials. See also the

information in "For non-emergency personnel".

ARALDITE 2014-1 GB HARDENER 6/20

**Date of printing** : 22 February 2013 (M)SDS no. : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 6: Accidental release measures**

# 6.2 Environmental precautions

: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

# 6.3 Methods and materials for containment and cleaning up

# **Small spill**

: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

#### Large spill

From leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

# 6.4 Reference to other sections

See Section 1 for emergency contact information.
 See Section 8 for information on appropriate personal protective equipment.
 See Section 13 for additional waste treatment information.

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

# **Protective measures**

: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

# Advice on general occupational hygiene

: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

# 7.2 Conditions for safe storage, including any incompatibilities

: Store between the following temperatures: 2 to 40°C (35.6 to 104°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

# Storage hazard class Huntsman Advanced Materials

: Storage class 12, Liquids, not dangerous

## 7.3 Specific end use(s)

**Recommendations**: Not available.

ARALDITE 2014-1 GB HARDENER 7/20

**Date of printing** : 22 February 2013 **(M)SDS no.** : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 7: Handling and storage**

Industrial sector specific : Not available.

solutions

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

# **Occupational exposure limits**

Product/ingredient name	Exposure limit values
1	EH40/2005 WELs (United Kingdom (UK), 1/2012). Absorbed through skin.  TWA: 4.3 mg/m³ 8 hours.  TWA: 1 ppm 8 hours.
4,4'-isopropylidenediphenol	EH40/2005 WELs (United Kingdom (UK), 1/2012). TWA: 10 mg/m³ 8 hours. Form: inhalable dust

# Recommended monitoring procedures

this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **Derived effect levels**

Product/ingredient name	Type	Exposure	Value	Population	Effects
2,2'-iminodi(ethylamine)	DNEL	Short term Inhalation	92.1 mg/m <sup>3</sup>	Workers	Systemic
	DNEL	Long term Inhalation	2.6 mg/m <sup>3</sup>	Workers	Local
	DNEL	Long term Dermal	11.4 mg/ kg bw/day	Workers	Systemic
	DNEL	Long term Inhalation	15.4 mg/m³	Workers	Systemic
	DNEL	Long term Dermal	1.1 mg/cm <sup>2</sup>	Workers	Local
	DNEL	Long term Inhalation	0.87 mg/m <sup>3</sup>	Workers	Local
	DNEL	Short term Oral	4.88 mg/ kg bw/day	Consumers	Local
	DNEL	Short term Inhalation		Consumers	Systemic
	DNEL	Long term Dermal	4.88 mg/ kg bw/day	Consumers	Systemic
	DNEL	Long term Inhalation	4.6 mg/m <sup>3</sup>	Consumers	Systemic
trientine	DNEL	Short term Inhalation	5380 mg/ m³	Workers	Systemic

	PNEC	Sewage Treatment Plant	4.25 mg/l	Assessment Factors
	PNEC	Secondary Poisoning	0.18 mg/kg	Assessment Factors

### 8.2 Exposure controls

Appropriate engineering controls

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

#### **Individual protection measures**

**Hygiene measures** 

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

# **Eye/face protection**

Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.

**ARALDITE 2014-1 GB HARDENER** 9/20

Date of printing : 22 February 2013 (M)SDS no. : 00074050

: 22 February 2013 : 2 **Date of issue** Version

# SECTION 8: Exposure controls/personal protection

#### **Skin protection**

Hand protection

: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.

Material of gloves for long term application (BTT>480min):

: butyl rubber, Ethyl Vinyl Alcohol Laminate (EVAL)

**Material of gloves for** short term/splash application (10min <BTT<480min):

: nitrile rubber, neoprene

(BTT = Break Through Time)

Use gloves approved to relevant standards e.g. EN 374 (Europe), F739 (US). Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material and dexterity. Always seek advice from glove suppliers. Additional information can be found for instance at www.gisbau.de.

**Body protection** 

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Other skin protection

: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Respiratory protection

: In case of inadequate ventilation wear respiratory protection. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

**Environmental exposure** controls

Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

# SECTION 9: Physical and chemical properties

**Conclusion/Summary** 

Skin : No additional information.

ARALDITE 2014-1 GB HARDENER 12/20

**Date of printing** : 22 February 2013 (M)SDS no. : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 11: Toxicological information**

**Respiratory**: No additional information.

# **Mutagenicity**

Product/ingredient name	Test	Result
M-(3-Aminopropyl)-N,N-dimethylpropane-1,3-diamine		Negative
2,2'-iminodi(ethylamine)	EPA CFR	Negative
	OECD 474 Mammalian Erythrocyte Micronucleus Test	Negative
trientine	-	Negative
4,4'-isopropylidenediphenol	-	Negative
	OECD 474 Mammalian Erythrocyte Micronucleus Test	Negative

**Conclusion/Summary** 

: 2,2'-iminodi(ethylamine)

No mutagenic effect.

trientine

The weight of the scientific evidence indicates that this material is non-genotoxic.

# **Carcinogenicity**

Product/ingredient name	Test	Species	Exposure	Result	Route of exposure	Target organs
2,2'-iminodi (ethylamine)	No official guidelines	Mouse	3 days per week	Negative	Dermal	-
trientine	OECD 451 Carcinogenicity Studies	Mouse	3 days per week	Negative	Dermal	-
4,4'- isopropylidenediphenol	-	Rat	103 weeks; 7 days per week	Negative	Oral	-

**Conclusion/Summary**: No additional information.

# **Reproductive toxicity**

Product/ingredient name	Test	Species	Result/Result type	Target organs
2,2'-iminodi(ethylamine)	OECD 421 Reproduction/ Developmental Toxicity Screening Test	Rat	Oral: 100 mg/kg NOAEL	-
4,4'-isopropylidenediphenol	-	Rat	Oral: 5 mg/kg NOAEL	-

Conclusion/Summary : Frientine In accordance with column 2 of Annex VII - X of

Regulation (EC) No 1907/2006, the test for this property of the substance does not need to be conducted.

# **Teratogenicity**

Product/ingredient name	Test	Species	Result/Result type
rientine	OECD 414 Prenatal Developmental Toxicity Study	Rat	>750 mg/kg NOAEL
	OECD 414 Prenatal Developmental Toxicity Study	Rabbit	125 mg/kg NOAEL
4,4'-isopropylidenediphenol	1	Rat - Female	640 mg/kg NOAEL

**Conclusion/Summary**: No additional information.

Specific target organ toxicity (single exposure)

ARALDITE 2014-1 GB HARDENER 13/20

**Date of printing** : 22 February 2013 **(M)SDS no.** : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 11: Toxicological information**

Product/ingredient name	Category	Route of exposure	Target organs
2,2'-iminodi(ethylamine)	Category 3	• •	Respiratory tract irritation
4,4'-isopropylidenediphenol	Category 3	• •	Respiratory tract irritation

#### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

Information on the likely

routes of exposure

: Not available.

#### Potential acute health effects

**Inhalation**: May give off gas, vapor or dust that is very irritating or corrosive to the respiratory

system. Exposure to decomposition products may cause a health hazard. Serious

effects may be delayed following exposure.

**Ingestion**: May cause burns to mouth, throat and stomach.

**Skin contact**: Causes skin irritation. May cause an allergic skin reaction.

**Eye contact** : Causes serious eye damage.

## Symptoms related to the physical, chemical and toxicological characteristics

Inhalation : No specific data.

**Ingestion**: Adverse symptoms may include the following:

stomach pains

**Skin contact**: Adverse symptoms may include the following:

pain or irritation

redness

blistering may occur

**Eye contact**: Adverse symptoms may include the following:

pain watering redness

#### Delayed and immediate effects and also chronic effects from short and long term exposure

# **Short term exposure**

Potential immediate : Not available.

effects

Potential delayed effects: Not available.

**Long term exposure** 

Potential immediate : Not available.

effects

Potential delayed effects: Not available.

Potential chronic health effects

ARALDITE 2014-1 GB HARDENER 14/20

**Date of printing** : 22 February 2013 **(M)SDS no.** : 00074050

Date of issue : 22 February 2013 Version : 2

# **SECTION 11: Toxicological information**

Product/ingredient name	Test	Result type		Result	Target organs
2,2'-iminodi(ethylamine)	OECD	NOEL	-	70 to 80 mg/kg/d	kidneys, liver
	No official guidelines	NOAEL		114 mg/kg/	-
	No official guidelines	NOEC	Vapour	550 mg/m <sup>3</sup>	-
trientine	-	NOAEL	-	50 mg/kg/d	-
4,4'-isopropylidenediphenol	OECD 407 Repeated Dose 28-day Oral Toxicity Study in Rodents	LOAEL	-	600 mg/kg	-
	Unknown guidelines	NOEC	Dusts and mists	10 mg/m <sup>3</sup>	respiratory tract

**Conclusion/Summary**: No additional information.

General : Once sensitized, a severe allergic reaction may occur when subsequently exposed

to very low levels.

Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Teratogenicity: No known significant effects or critical hazards.

Developmental effects: No known significant effects or critical hazards.

Fertility effects: No known significant effects or critical hazards.

Other information : Not available.

Date of issue : 22 February 2013 Version : 2

# **SECTION 12: Ecological information**

# 12.5 Results of PBT and vPvB assessment

Not applicable.

**12.6 Other adverse effects**: No known significant effects or critical hazards.

## 12.7 Other ecological information

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

#### **Product**

**Methods of disposal** 

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

# Hazardous waste : Yes European waste catalogue (EWC)

Waste code	Waste designation
07 02 04*	other organic solvents, washing liquids and mother liquors

### **Packaging**

**Methods of disposal** 

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

**Special precautions** 

: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

# SECTION 15: Regulatory information

# 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture EU Regulation (EC) No. 1907/2006 (REACH)

This product is compliant with the REACH Regulation EC 1907/2006.

Huntsman has pre-registered and is registering all of the substances that it manufactures in or imports into the European Economic Area (EEA) that are subject to Title II of the REACH Regulation.

#### Annex XIV - List of substances subject to authorisation

#### Substances of very high concern

None of the components are listed.

**Annex XVII - Restrictions** on the manufacture, placing on the market and use of certain dangerous substances,

mixtures and articles

# Other EU regulations

: All components are listed or exempted. **Europe inventory** 

: Not applicable.

**Black List Chemicals** : Not listed **Priority List Chemicals**  Listed : Not listed Integrated pollution

prevention and control list (IPPC) - Air

Integrated pollution prevention and control list (IPPC) - Water
