

# Pretium EDGE® Solutions Trunk Cable, OM3, Low-Loss, MTP® to MTP, 72 fibres

840/840 mm leg lengths, pulling grip one side, 10 m

CORNING

Corning Cable Systems LANscape® Pretium EDGE® (Evolved-Density, Growth-Enabled) Solutions are high density pre-terminated optical cabling systems that simplify installation and improve performance in data centre environments. Pretium EDGE Solutions provide increased system density and offer the highest port density in the market. The modular system approach with pre-terminated components allows for reduced installation time and faster moves, adds and changes (MACs).

Corning Cable Systems' factory-terminated solutions provide improved system performance, ensure component compatibility and yield consistent quality.

Pre-terminated trunk cabling systems fitted with a factory-installed protective pulling grip are routed through the cabling pathways and spaces. Once deployed, the pulling grip is removed and the MTP® connectors on both ends are plugged into connector panels or modules.

High-density MTP connector-based trunk systems plug into breakout modules or harnesses for a simple, fast-to-deploy, modular solution with easy scalability.

Part Number: G757572TLZ88U010M

## Features and Benefits

Provide 12 to 144 fibre connectivity

Cables are: Low smoke (IEC 61034) and zero-halogen (IEC 60754-1), flame retardant to IEC 60332-3 and non-corrosive to IEC 60754-2 (FRNC)

Utilize MTP connectors

- Small Form Factor
- 12-fibre push/pull optical connectors
- minimize errors and reduce space

Allow for lower bend radii and smaller slack loops

Enable up to 6x the cable tray capacity over traditional bulkier cabling solutions

Save up to 65 percent space, minimize cable tray weight and improve air flow

Meet the highest skew criteria for 100G

Feature round furcation legs that provide easy routing and improved storage

Feature small-profile furcation plugs

- allow stress-free cable mounting
- leave no legs outside the housing
- are shipped with strain-relief mounting cradles
