- Class leading absorbency rate for superior performance
- Dimensions: 1200mm x 1000mm
- Pack Quantity: 20
- Absorbency Rate per Sock: 5

## **Product Description**

The Spilchoice Standard Maintenance Sock is ideal for environments where the fast, effective containment and recovery of oil and water based spills, including paints, solvents, coolants and mild chemicals is essential.

It is constructed using a flexible knitted outer fabric that expands quickly to increase the rate of absorption whilst providing improved strength, liquid retention and durability. A superior absorbent fill results in the Spilchoice Standard Maintenance Sock having a class leading absorbency for superior performance.
