

Splice Protection

Heat-Shrink Fusion Splice Protector Parts, single-fiber, 60 mm long

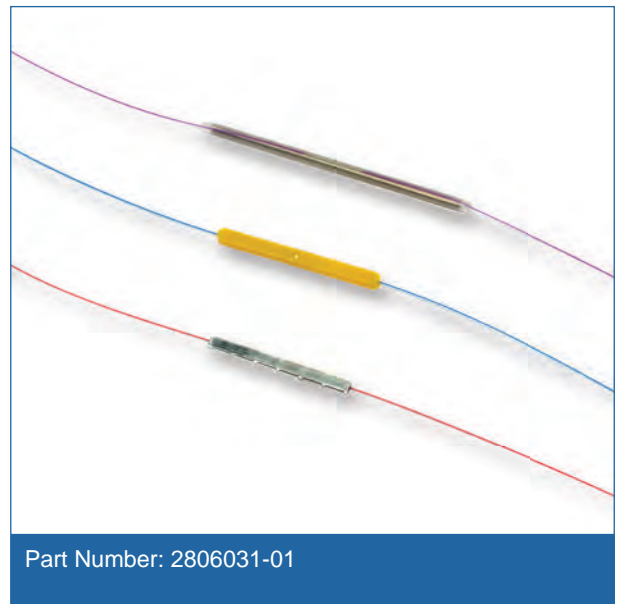

CORNING

Corning offers a variety of splice protection choices to meet your needs. All the types of protection allow individual fiber access in the splice tray. Corning offers heat-shrink protection in both single-fiber and multifiber versions.

The sleeve securely protects the fusion splice on either 250 or 900 μm coated fibers, while offering individual access to each fusion splice. Corning heat-shrink sleeves are compatible with most splice trays offered and are compatible with all heat-shrink ovens offered with Corning fusion splicers.
