

Model 1006-AP325

Right-Angle AP Wall Bracket for Aruba AP325

Category: Wall and Hard Ceiling - Surface Mount - Right-Angle Brackets

Many AP manufacturers recommend APs be mounted in a horizontal orientation. Secure APs from most manufacturers in areas where wall mounting may be required, such as residence halls, hotels, and other hard lid venues. The AP is partially recessed into the right-angle bracket, exposing only the antenna face of the AP. Conduit, raceways, and cable can be terminated in the bracket. The AP can be locked in place using the manufacturer's locking features. Specify AP and model when ordering.

NOTE: The Aruba AP-325 (only) has a BLE (Bluetooth low energy) antenna on the back side of the AP. This BLE antenna may not provide the desired coverage when mounted in an Oberon mount or enclosure. If you intend to use BLE services with the Aruba AP-325 access point in an Oberon product, please contact your Oberon customer service representative for an appropriate solution.

Features & Benefits

- Conveniently install wireless APs on walls and above ceilings
- Enables wireless access points to be mounted in preferred horizontal orientation
- AP is partially recessed into bracket, providing aesthetic appearance
- Can be mounted directly over telecommunications outlet

Technical Specifications

- Design: Right-angle mounting bracket for securing wireless access points on walls. Designed to mount the access point in the preferred horizontal orientation. For Aruba AP325.
- AP is partially recessed into bracket, providing aesthetic appearance
- Construction: 12 ga. white powder-coated steel
- Size: 10.25 inches by 10.5 inches by 2.5 inches (260mm by 260mm by 64mm)

Configurations

Model Number Guide:

Model Number	Designed for AP Model
1006-AP225	Aruba Networks AP225
1006-AP325	Aruba Networks AP325
1006-AP335	Aruba Networks AP335
1006-CCOAP	Cisco 2600, 2700, 3500, 3600, 3700 Series APs
