## Keystone Wall Plates

### For home and office premise wiring

Flush Mount Keystone Wall Plates from C2G simplify the most complicated station installation requirements through a wide selection of snap in jacks to meet your specific voice, data, audio/video and fiber optic requirements. Write-on designation labels with holders are provided for identifying different systems or stations.

- Dual gang: 8-port; Single gang: 1 to 6-port
- Works with keystone jacks or keystone inserts for a professional looking cabling system
- Mounts to any electrical box, or surface mount box; compatible with NEMA standard openings and boxes

Item#	Description	MSRP
03710	1-Port Keystone Wall Plate - Ivory.....	\$1.99

## Modular In-line Couplers

### Designed to connect two patch cables together

If you need to link several line cables together, or extend existing modular cable runs, the In-line Coupler from C2G can help you make the right connection. The in-line coupler provides a female to female feed through connection for easy cable hookup.

- Designed for data applications
- Extends the length of two patch cables
- Lifetime warranty

Item#	Description	MSRP
20201	Cat5e RJ45 Modular In-line Coupler - Black .....	\$7.99

01938	RJ45 8-Pin Modular "T" Adapter for Phone - White.....	\$3.99

## Metal Shielded Keystone Jacks

### 180° 110/KRONE IDC punchdown; T568A/B

Designed for superior performance, this keystone jack will work with C2G wall plates and surface boxes or any standard keystone and angled multimedia wall plate or patch panel. Each shielded keystone jack includes 110type IDC straightback termination with a 2-piece metal cover, and comes standard with 50 micron gold plating on the jack contacts.

- Panel-type shielded RJ45 (8P8C)
- Termination: 110/KRONE IDC vertical punchdown for 22-26AWG solid wires
- Supports: Dual T568A & T568B wiring compatible with Cat5 enhanced requirement
- Certifications: UL-listed; TIA/EIA 568A/B; ISO/IEC 11801 Class E
