Overview

Vicon's Roughneck® V922D-A Series of HD IP Camera Domes is designed for performance in the most demanding security installations. The 1080P megapixel camera offers 120 dB Wide Dynamic Range (WDR) and IR illuminators. There are models with a manual or motorized varifocal autoiris lens.

The V922D-A Series provides triple-streaming video and supports H.264 compression technology, drastically reducing file sizes and conserving valuable network bandwidth. Users can receive multiple streams simultaneously in different resolutions, frame rates and image qualities for viewing on different platforms. MPEG-4 and M-JPEG compression are also provided. The camera can generate two streams at full 1080P resolution (60 fps); for triple stream 30 fps resolution for multi-camera displays.

The camera dome is designed for easy installation. Power over Ethernet (IEEE 802.3af) eliminates the need for power cables, providing a cost-effective method of installation. The camera

also accepts 12 VDC. The V922D-A can be mounted on a wall, ceiling or standard 4 x 4 electrical box. With an adapter, it can also be pendant mounted on a wall mount or in-ceiling. The camera position is adjustable to any view required. Additionally, a composite output is provided for installation using a spot monitor (NTSC/PAL selectable).

In order to adapt to constantly changing outdoor lighting conditions, the V922D-A series features an autoiris lens to protect from damage induced by direct sunlight. The true day/night progressive scan camera also includes a removable IR cut filter for superior image quality around the clock. Wide Dynamic Range (120 dB) further improves video exposure quality in scenes with high contrast between bright and dark areas.

For protection against the elements, the camera dome is IP66 rated with a vandal-proof casing to withstand rain, dust, and vandalism; it is secured by tamperproof screws. The camera dome provides 3-axis adjustment for any angle of view.
