

Micro Keyfob

600-1064-95R

OVERVIEW

The Micro Keyfob is a small, powerful touchpad that functions as an electronic key to arm and disarm systems wirelessly. Functionality also includes the ability to activate police or auxiliary panic alarms, turn lights on/off or open a garage door—all from up to 500 feet away.

Its highly compact size means the Micro Keyfob easily fits in purses, pockets or on a keychain. Plus, a specially designed Arm button, featuring small indentations, enables users to send commands blindly without having to look at the keyfob.

STANDARD FEATURES

- Electronic key
