

IPBTN

Smart IP Enabled Emergency/Panic Button

IP Button Overview

The Smart IP Button (IPBTN) is a Power over Ethernet (PoE) device that requires only a RJ-45 connector to connect to existing data networks. The IPBTN is SIP enabled and can be utilized to trigger an emergency notification or just to create a general alert notification.

The smallest IP button in the industry can be mounted under a table, desk or in a discrete location. The button makes a call to a preset phone or extension number.

Features

- Simple Web-based setup and can also be provisioned using a configuration file
- Use existing data networks
- Compatible with AND's IP Clockwise and other third party software
- SIP Enabled
- HTTP support
- Can be configured remotely
- Field upgradable

Easy Installation:
