

Nice-Duc surface wire concealment

Application. Nice-Duc is the ideal self-adhesive wiring duct for concealing low-voltage alarm systems in completed structures. You can use Nice-Duc on walls, ceilings, woodwork, metal doors, and window frames. You can also use Nice-Duc to conceal a variety of other wires and cables, including telephone, audio, and video.

Nice-Duc comes in mini and standard sizes (*Figure 73*). Both sizes come in a 60 in. (1.5 m) length. A variety of right angles, T-connectors, inside and outside corners, and end caps are also available. Nice-Duc comes in white, off-white, or brown.

Installation. For easy installation, Nice-Duc features a hinged design on one side and a slot tract on the other that snaps shut with the wire inside. Low initial tack lets you move Nice-Duc without damaging tape or surface. The thin wall design is easy to cut to fit. To install Nice-Duc, clean the mounting surface with the alcohol cleaning pads included with the product, strip off the self-adhesive cover, and place the Nice-Duc in position (use connectors if needed).

Recommended products. ND5-WH-MINI, ND5-OW-MINI, ND5-BR-MINI, ND5-WH-STD-2P, ND5-OW-STD-2P, ND5-BR-STD-2P, ND5-BE-STD-2P;
Connector packs: 5U5-WH-STD, 5U5-OW-STD, 5U5-STD-BR, 5U5-BE-STD
