

# PROLABS – QSFP-H40G-AOCXM

## 40GBd QSFP+ Active Optical Cable Transceiver

### Key Features

- 4 high-speed full duplex channels
- QSFP+ MSA compliant
- Cable lengths from 1 to 100 meters
- Small 3mm diameter fiber cable
- Low Power consumption, less than 1W
- RoHS Compliance
- Operating temperature range: 0°C to 70°C.

### Applications

- 40G Ethernet
- Infiniband interconnects

### Ordering Information

Part Number	Description
QSFP-H40G-AOCXM	40G QSFP+ Active optical Cable (length from 1m to 100m)

### Introduction

PROLABS's QSFP-H40G-AOCXM QSFP+ active optical cable transceivers are 4-channel active optical cable for QSFP+ applications that is designed to meet the QSFP+ 10GBPS X 4 Pluggable Transceiver SFF-8436 specification. This full-duplex optical assembly offers 4 independent transmit and receive channels, each capable of 10Gbps for an aggregate bandwidth of 40Gbps. The cables use the standard multimode fiber cable carrying a nominal wavelength of 850nm. The electrical interface is standard 38 contact edge type connector and is electrically compliant with the SFI+ and PPI interface supporting Infiniband, Ethernet, Fiber Channel. The connector is hot pluggable and provides I2C serials access via an on-board microcontroller. QSFP+ AOC can be used as a direct replacement for traditional copper cables with the added benefit of a lighter weight and smaller diameter solution for cable lengths from 1 to 100 meters.

Eye Mask for Hit Ratio =  $1 \times 10^{-12}$

## Specification

**Block Diagram of Transceiver**

The QSFP AOC has miniature optical engine embedded into each end of the cable assembly. The engines interconnect 4 independent transmit/receive lanes.

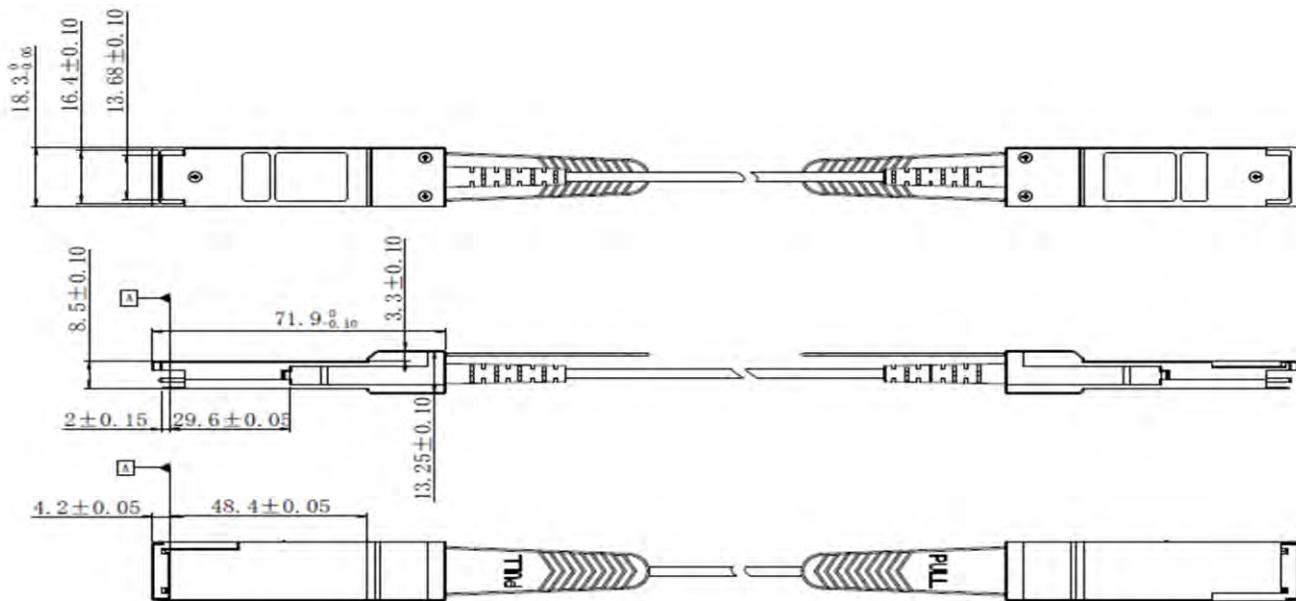

A functional block diagram of the engine is shown in the above Figure. The transmitter sections consists of a 4-channel VCSEL array, a 4-channel input buffer and laser driver.

An on board micro-controller provides control, diagnostic and monitoring for the cable functions, as well as the external I2C serial communication interface.

The Receiver section consists of a 4-channel PIN photodiode array, a 4-channel TIA array, and a 4-channel output buffer.
