UL Listed Enclosure with Weatherproof-in-Use Cover

New Features
for **EXTRA-DUTY**
Code Compliance

Why install boxes like this...

...when you can Look Great Outdoors with GARD-N-POST!

Arlington's **Gard-N-Posts™** are the attractive, safe, easy way to install devices outdoors!

The GPD19 Gard-N-Post™ is a UL Listed enclosure with a clear, weatherproof-in-use cover. Built-in stabilizers deliver rigid support and need no assembly. The post is angled at the bottom to allow easy access to underground wires.

This one-piece unit costs about the same as multiple piece assemblies – but installs faster and looks a lot better.

The colorant runs throughout the post, so there's no chipping or color loss.

- 19.5" tall enclosure ships with a clear, **extra-duty** weatherproof-in-use cover, GFCI and duplex wall plate (no gasket required)
- Four permanent, damage-resistant colors: green, black, bronze, white
- Made of heavy-duty, UV-rated plastic
- UL Listed enclosure – Meets 2011 NEC extra-duty code requirements
